Microbiology: An Introduction, 11th Edition By Gerard J. Tortora, Berdell R. Funke, Christine L. Case

This #1 selling non-majors microbiology textbook is praised for its straightforward presentation of complex topics, careful balance of concepts and applications, and proven art that teaches. In its **Eleventh Edition**, Tortora, Funke, and Case's **Microbiology: An Introduction** helps you make the connection between microbiology and human health. This edition continues to incorporate the latest in microbiology research and includes more features designed to engage you and promote critical thinking.

With the complex and extensive information presented in introductory microbiology courses, demonstrating the connections between processes you can't see with your naked eye and diseases you will encounter in future careers can be challenging. **Microbiology: An Introduction** guides you through the process of disease diagnosis, aided by the practical application of the new Clinical Cases that are integrated through every textbook chapter.

This package contains:

- **Microbiology: An Introduction, Eleventh Edition**

Editorial Review

About the Author

Gerard J. Tortora is a professor of biology and teaches microbiology, human anatomy, and physiology at Bergen Community College in Paramus, New Jersey. He received his M.A. in Biology from Montclair State College in 1965. He belongs to numerous biology/microbiology organizations, such as the American Society of Microbiology (ASM), Human Anatomy and Physiology Society (HAPS), American Association for the Advancement of Science (AAAS), National Education Association (NEA), New Jersey Educational Association (NJEA), and the Metropolitan Association of College and University Biologists (MACUB). Jerry is the author of a number of biological science textbooks. In 1995, he was selected as one of the finest faculty scholars at Bergen Community College and was named Distinguished Faculty Scholar. In 1996, Jerry received a National Institute for Staff and Organizational Development (NISOD) excellence award from the University of Texas and was selected to represent Bergen Community College in a campaign to increase awareness of the contributions of community colleges to higher education.

Berdell R. Funke received his Ph.D., M.S., and B.S. in microbiology from Kansas State University. He has spent his professional years as a professor of microbiology at North Dakota State University. He taught introductory microbiology, including laboratory sections, general microbiology, food microbiology, soil microbiology, clinical parasitology, and pathogenic microbiology. As a research scientist in the Experiment Station at North Dakota State, he has published numerous papers on soil microbiology and food microbiology.

Christine L. Case is a registered microbiologist and a professor of microbiology at Skyline College in San Bruno, California, where she has taught for the past 38 years. She received her EdD. in curriculum and instruction from Nova Southeastern University and her M.A. in microbiology from San Francisco State University. She was Director for the Society for Industrial Microbiology (SIM). She received the ASM and California Hayward outstanding educator awards. In addition to teaching, Chris contributes regularly to professional literature, develops innovative educational methodologies, and maintains a personal and professional commitment to conservation and the importance of science in society. Chris is also an avid photographer, and many of her photographs appear in this book.

Users Review

From reader reviews:

Troy Harlow:

Information is provisions for people to get better life, information nowadays can get by anyone on everywhere. The information can be a understanding or any news even a huge concern. What people must be consider while those information which is from the former life are challenging be find than now could be taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you have the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Microbiology: An Introduction, 11th Edition as the daily resource information.

Barbara Erickson:
