The Transformation of European Politics, 1763-1848: Episode or Model in Modern History? (Forschungen zur Geschichte der Neuzeit. Marburger Beiträge) (v. 5) From LIT Verlag

This book takes up a question raised about the nature of the European international system in the late eighteenth-early nineteenth centuries by Paul W. Schroeder's pathbreaking and controversial work, "The Transformation of European Politics, 1763-1848" (1994). Schroeder's central claim was that the European states system underwent a fundamental transformation in the revolutionary, Napoleonic, and Vienna eras from a system of competitive, conflictual power politics based purely on a shifting balance of power to a more consensual, stable, and peaceful set of relations based on legality, acknowledged rights and obligations, and shared norms. The contributors to this volume, while examining this claim, primarily extend the debate to the entire history of European and world international politics from the early seventeenth century to the present. If this transformation was real, they ask, was it only a temporary episode, or does it represent an example of other transformations or structural changes in international politics over the centuries down to the present day, and a possible model for change in the future?
