The Wounded Researcher: Research with Soul in Mind By Robert Romanyshyn

What is the art of doing research that keeps soul in mind? The Wounded Researcher addresses (1) how an imaginal approach to the research process differentiates soul from the complex of psychology (2) how re-search is a vocation in which a topic chooses a researcher through his or her complexes (3) how engaging in transference dialogues helps to differentiate a researcher's complexes about the work from the soul of the work (4) how an alchemical hermeneutic method opens a space for the soul of the work (5) how this process and method have implications for how one writes down the soul of the work in writing up one's research and (6) how this imaginal approach to research that keeps soul in mind lays the foundations for an ethical epistemology.

Editorial Review

Review

Soul work and academic research have been so split apart that both have been lamed -- soul psychology without intellectual respectability and scholarly research utterly irrelevant to the soul's concerns.

Romanyshyn's book not only follows from all his earlier diligent explorations in the Western history of soul, but charts a course that joins the integrity of scholarly work with devotion to the soul's vital needs. New winds, new directions, new methods. --James Hillman
