### A Pedestrian Approach to Quantum Field Theory (Dover Books on Physics)

By Edward G Harris

Written by a renowned professor of physics, this introductory text is geared toward graduate students taking a year-long course in quantum mechanics in which the third quarter is devoted to relativistic wave equations and field theory. Difficult concepts are introduced gradually, and the theory is applied to physically interesting problems.

After an introductory chapter on the formation of quantum mechanics, the treatment advances to examinations of the quantum theory of the free electromagnetic field, the interaction of radiation and matter, second quantization, the interaction of quantized fields, and quantum electrodynamics. Additional topics include the theory of beta decay, particles that interact among themselves, quasi particles in plasmas and metals, and the problem of infinities in quantum electrodynamics. The Appendix contains selected answers to problems that appear throughout the text.

### **Editorial Review**

About the Author

Edward G. Harris was a Benford Foundation Distinguished Professor of Physics. He taught at the University of Tennessee for 37 years and also served as a consultant to Oak Ridge National Laboratory.

### **Users Review**

**From reader reviews:**

**Thomas Welty:**

Book is definitely written, printed, or outlined for everything. You can recognize everything you want by a book. Book has a different type. As it is known to us that book is important thing to bring us around the world. Beside that you can your reading skill was fluently. A e-book A Pedestrian Approach to Quantum Field Theory (Dover Books on Physics) will make you to become smarter. You can feel considerably more confidence if you can know about anything. But some of you think which open or reading any book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you looking for best book or appropriate book with you?

**Rosemarie Cleveland:**

The book A Pedestrian Approach to Quantum Field Theory (Dover Books on Physics) can give more knowledge and also the precise product information about everything you want. Why then must we leave the good thing like a book A Pedestrian Approach to Quantum Field Theory (Dover Books on Physics)? Several of you have a different opinion about reserve. But one aim this book can give many details for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or details that you take for that, you can give for each other; you could share all of these. Book A Pedestrian Approach to Quantum Field Theory (Dover Books on Physics) has simple shape but the truth is know: it has great and large function for you. You can search the enormous world by open up and read a e-book. So it is very wonderful.

**Gene Green:**

As people who live in the modest era should be upgrade about what going on or details even knowledge to make these individuals keep up with the era which is always change and progress. Some of you maybe will update themselves by reading books. It is a good choice for yourself but the problems coming to anyone is you don't know what type you should start with. This A Pedestrian Approach to Quantum Field Theory (Dover Books on Physics) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

**Donald Burgess:**

Are you kind of busy person, only have 10 or even 15 minute in your day time to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your limited time to read it because all of this time you only find e-book that need more time to be examine. A Pedestrian Approach to Quantum Field Theory (Dover Books on Physics) can be your answer as it can be read by anyone who have those short free time problems.
