Editorial Review

About the Author

Charles Miller has taught at America River College for many years.

Vern Heeren received his bachelor's degree from Occidental College and his master's degree from the University of California, Davis, both in mathematics. He is a retired professor of mathematics from American River College where he was active in all aspects of mathematics education and curriculum development for thirty-eight years. Teaming with Charles D. Miller in 1969 to write *Mathematical Ideas*, the pair later collaborated on *Mathematics: An Everyday Experience*; John Hornsby joined as co-author of *Mathematical Ideas* on the later six editions. Vern enjoys the support of his wife, three sons, three daughters in-law, and eight grandchildren.

John Hornsby: When a young John Hornsby enrolled in Louisiana State University, he was uncertain whether he wanted to study mathematics education or journalism. Ultimately, he decided to become a teacher. After twenty five years in high school and university classrooms, each of his goals has been realized. His passion for teaching and mathematics manifests itself in his dedicated work with students and teachers, while his penchant for writing has, for twenty five years, been exercised in the writing of mathematics textbooks. Devotion to his family (wife Gwen and sons Chris, Jack, and Josh), numismatics (the study of coins) and record collecting keep him busy when he is not involved in teaching or writing. He is also an avid fan of baseball and music of the 1960's. Instructors, students, and the 'general public' are raving about his recent *Math Goes to Hollywood* presentations across the country.

Users Review

From reader reviews:

John Alfaro:

The book *Mathematical Ideas (12th Edition)* gives you the sense of being enjoy for your spare time. You can use to make your capable a lot more increase. Book can for being your best friend when you getting anxiety or having big problem together with your subject. If you can make examining a book *Mathematical Ideas (12th Edition)* to get your habit, you can get a lot more advantages, like add your personal capable, increase your knowledge about many or all subjects. You could know everything if you like open up and read a reserve *Mathematical Ideas (12th Edition)*. Kinds of book are several. It means that, science guide or encyclopedia or some others. So , how do you think about this book?

Shameka Nye:

Do you among people who can't read enjoyable if the sentence chained within the straightway, hold on guys that aren't like that. This *Mathematical Ideas (12th Edition)* book is readable simply by you who hate the perfect word style. You will find the data here are arrange for enjoyable reading through experience without leaving possibly decrease the knowledge that want to deliver to you. Kathy Lloyd:

As a college student exactly feel bored to help reading. If their teacher asked them to go to the library in order to make summary for some reserve, they are complained. Just little students that has reading's internal or real their hobby. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Mathematical Ideas (12th Edition) can make you experience more interested to read.
