**Nanoporous Materials IV, Volume 156: Proceedings of the 4th International Symposium on Nanoporous Materials, Niagara Falls, Ontario, Canada June 7-10, 2005 (Studies in Surface Science and Catalysis)** From Elsevier Science

**Nanoporous Materials IV** contains the invited lectures and peer-reviewed oral and poster contributions to be presented at the 4th International Symposium on Nanoporous Materials, which will be hosted in Niagara Falls, Ontario, Canada, June 7-10, 2005. This volume covers complementary approaches to and recent advances in the field of nanostructured materials with pore sizes larger than 1nm, such as periodic mesoporous molecular sieves (e.g., MCM-41 and SBA-15) and related materials including clays, ordered mesoporous carbons, colloidal crystal templated materials, porous polymers and sol gels. The broad range of topics covered in relation to the synthesis and characterization of ordered mesoporous materials are of great importance for advanced adsorption, catalytic, separation and environmental processes as well as for the development of nanotechnology.

This volume contains over 120 contributions related to the synthesis of ordered mesoporous silicas, organosilicas, nonsiliceous inorganic materials, carbons, polymers and related materials, their characterization and applications in adsorption, catalysis and environmental clean up.

- \* Unique contributions brings readers up-to-date on new research and application developments
- \* Figures and tables supplement comprehensive topics
- \* Extensive author and subject index

## **Editorial Review**

### **Users Review**

#### **From reader reviews:**

##### **Dolores Stiger:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite e-book and reading a publication. Beside you can solve your trouble; you can add your knowledge by the e-book entitled Nanoporous Materials IV, Volume 156: Proceedings of the 4th International Symposium on Nanoporous Materials, Niagara Falls, Ontario, Canada June 7-10, 2005 (Studies in Surface Science and Catalysis). Try to face the book Nanoporous Materials IV, Volume 156: Proceedings of the 4th International Symposium on Nanoporous Materials, Niagara Falls, Ontario, Canada June 7-10, 2005 (Studies in Surface Science and Catalysis) as your pal. It means that it can to get your friend when you truly feel alone and beside that course make you smarter than ever before. Yeah, it is very fortunated in your case. The book makes you far more confidence because you can know anything by the book. So , let me make new experience as well as knowledge with this book.

##### **Bernice Hicks:**

The reserve with title Nanoporous Materials IV, Volume 156: Proceedings of the 4th International Symposium on Nanoporous Materials, Niagara Falls, Ontario, Canada June 7-10, 2005 (Studies in Surface Science and Catalysis) has a lot of information that you can find out it. You can get a lot of gain after read this book. This particular book exist new information the information that exist in this book represented the condition of the world now. That is important to yo7u to be aware of how the improvement of the world. This book will bring you within new era of the the positive effect. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

##### **Eric Bittinger:**

Is it an individual who having spare time and then spend it whole day by watching television programs or just lying on the bed? Do you need something totally new? This Nanoporous Materials IV, Volume 156: Proceedings of the 4th International Symposium on Nanoporous Materials, Niagara Falls, Ontario, Canada June 7-10, 2005 (Studies in Surface Science and Catalysis) can be the answer, oh how comes? The new book you know. You are so out of date, spending your extra time by reading in this completely new era is common not a nerd activity. So what these guides have than the others?

**Charlsie Sprouse:**

A lot of reserve has printed but it is unique. You can get it by web on social media. You can choose the best book for you, science, witty, novel, or whatever by searching from it. It is named of book Nanoporous Materials IV, Volume 156: Proceedings of the 4th International Symposium on Nanoporous Materials, Niagara Falls, Ontario, Canada June 7-10, 2005 (Studies in Surface Science and Catalysis). You can contribute your knowledge by it. Without departing the printed book, it may add your knowledge and make you happier to read. It is most critical that, you must aware about reserve. It can bring you from one spot to other place.
