Theory of Complex Functions (Graduate Texts in Mathematics) (v. 122)

By Reinhold Remmert

Theory of Complex Functions (Graduate Texts in Mathematics) (v. 122) By Reinhold Remmert

A lively and vivid look at the material from function theory, including the residue calculus, supported by examples and practice exercises throughout. There is also ample discussion of the historical evolution of the theory, biographical sketches of important contributors, and citations - in the original language with their English translation - from their classical works. Yet the book is far from being a mere history of function theory, and even experts will find a few new or long forgotten gems here. Destined to accompany students making their way into this classical area of mathematics, the book offers quick access to the essential results for exam preparation. Teachers and interested mathematicians in finance, industry and science will profit from reading this again and again, and will refer back to it with pleasure.

Editorial Review

Review

R. Remmert and R.B. Burckel

Theory of Complex Functions

*"Its accessibility makes it very useful for a first graduate course on complex function theory, especially where there is an opportunity for developing an interest on the part of motivated students in the history of the subject. Historical remarks abound throughout the text. Short biographies of Abel, Cauchy, Eisenstein, Euler, Riemann and Weierstrass are given. There is an extensive bibliography of classical works on complex function theory with comments on some of them. In addition, a list of modern complex function theory texts and books on the history of the subject and of mathematics is given. Throughout the book there are numerous interesting quotations. In brief, the book affords splendid opportunities for a rich treatment of the subject."?*MATHEMATICAL REVIEWS

Users Review

From reader reviews:

Lucille Renner:

The book Theory of Complex Functions (Graduate Texts in Mathematics) (v. 122) gives you the sense of being enjoy for your spare time. You need to use to make your capable considerably more increase. Book can to be your best friend when you getting anxiety or having big problem with the subject. If you can make reading a book Theory of Complex Functions (Graduate Texts in Mathematics) (v. 122) to become your habit, you can get far more advantages, like add your own capable, increase your knowledge about many or all subjects. You could know everything if you like open and read a publication Theory of Complex Functions (Graduate Texts in Mathematics) (v. 122). Kinds of book are a lot of. It means that, science reserve or encyclopedia or others. So , how do you think about this publication?

Mildred Patton:

What do you with regards to book? It is not important together with you? Or just adding material if you want something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to perform others business, it is make you feel bored faster. And you have spare time? What did you do? Everybody has many questions above. They should answer that question mainly because just their can do that will. It said that about book. Book is familiar in each person. Yes, it is suitable. Because start from on jardín de infancia until university need that Theory of Complex Functions (Graduate Texts in

Mathematics) (v. 122) to read.

Wilma Baca:

As people who live in typically the modest era should be upgrade about what going on or details even knowledge to make them keep up with the era and that is always change and move forward. Some of you maybe will certainly update themselves by examining books. It is a good choice to suit your needs but the problems coming to you is you don't know which you should start with. This Theory of Complex Functions (Graduate Texts in Mathematics) (v. 122) is our recommendation to help you keep up with the world. Why, because book serves what you want and wish in this era.

Shirley Drago:

Playing with family in a very park, coming to see the coastal world or hanging out with friends is thing that usually you have done when you have spare time, in that case why you don't try issue that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Theory of Complex Functions (Graduate Texts in Mathematics) (v. 122), it is possible to enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh can occur its mind hangout guys. What? Still don't have it, oh come on its identified as reading friends.
