It is aimed at leaders who want insight into IC techniques for use in both day-to-day operational and change situations, for example, and also at the communication specialist seeking shared wisdom and new ideas. These include organizations' increasing need for innovation and responsiveness in a superfast changing environment; employees' increasing assertion of rights and personal requirements at work; management's increasing recognition of the importance of corporate reputation/brand value, particularly how to sustain and extend it; and finally, the effects on work and management patterns of digital communication. Step-by-step guides introduce you to creating IC strategies and to carrying out research and measurement.
