Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) By Gene H. Golub, Gérard Meurant

This computationally oriented book describes and explains the mathematical relationships among matrices, moments, orthogonal polynomials, quadrature rules, and the Lanczos and conjugate gradient algorithms. The book bridges different mathematical areas to obtain algorithms to estimate bilinear forms involving two vectors and a function of the matrix. The first part of the book provides the necessary mathematical background and explains the theory. The second part describes the applications and gives numerical examples of the algorithms and techniques developed in the first part.

Applications addressed in the book include computing elements of functions of matrices; obtaining estimates of the error norm in iterative methods for solving linear systems and computing parameters in least squares and total least squares; and solving ill-posed problems using Tikhonov regularization.

This book will interest researchers in numerical linear algebra and matrix computations, as well as scientists and engineers working on problems involving computation of bilinear forms.

Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) By Gene H. Golub, Gérard Meurant Bibliography

- Sales Rank: #2203987 in Books
- Brand: Brand: Princeton University Press
- Published on: 2009-12-27
- Original language: English
- Number of items: 1
- Dimensions: 9.20" h x 1.10" w x 6.10" l, 1.45 pounds
- Binding: Hardcover
- 376 pages

Editorial Review

About the Author

Gene H. Golub (1932-2007) was the Fletcher Jones Professor of Computer Science at Stanford University and the coauthor of "Matrix Computations." Gérard Meurant, the author of three books on numerical linear algebra, has worked in scientific computing for almost four decades. He is retired from France's Commissariat à l'énergie Atomique.

Users Review

From reader reviews:

Thomas Kelly:

In this 21st century, people become competitive in every single way. By being competitive right now, people have to do something to make all of them survive, being in the middle of typically the crowded place and notice by means of surrounding. One thing that at times many people have underestimated this for a while is reading. Sure, by reading a book your ability to survive boost then having chance to stand up than other is high. For you personally who want to start reading a book, we give you this kind of Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) book as starter and daily reading e-book. Why, because this book is greater than just a book.

Wesley McFarland:

Do you among people who can't read gratifying if the sentence chained inside straightway, hold on guys this particular aren't like that. This Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) book is readable by simply you who hate those straight word style. You will find the info here are arranged for enjoyable reading experience without leaving even decrease the knowledge that want to offer to you. The writer regarding Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) content conveys the thought easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different available as it. So, do you even now thinking Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) is not loveable to be your top list reading book?

Susan Bondurant:

You can spend your free time to study this book this book. This Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) is simple to bring you can read it in the park, in the beach, train and soon. If you did not have much space to bring often the printed book, you can buy often the e-book. It is make you better to read it. You can save often the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Thomas Mitchell:

Beside this kind of Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) in your phone, it can give you a way to get more close to the new knowledge or information. The information and the knowledge you might got here is fresh in the oven so don't end up being worry if you feel like an older people live in narrow small town. It is good thing to have Matrices, Moments and Quadrature with Applications (Princeton Series in Applied Mathematics) because this book offers to you readable information. Do you at times have book but you don't get what it's all about. Oh come on, that would not happen if you have this in your hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss it? Find this book and also read it from right now!
