Say Goodbye: An FBI Profiler Novel By Lisa Gardner

The bestselling author of *Hide* and *Gone* draws us into the venomous mind games of a terrifying killer.

Come into my parlor . . .

For Kimberly Quincy, FBI Special Agent, it all starts with a pregnant hooker. The story Delilah Rose tells Kimberly about her johns is too horrifying to be true—but prostitutes are disappearing, one by one, with no explanation, and no one but Kimberly seems to care.

Said the spider to the fly . . .

As a member of the Evidence Response Team, dead hookers aren't exactly Kimberly's specialty. The young agent is five months pregnant—she has other things to worry about than an alleged lunatic who uses spiders to do his dirty work. But Kimberly's own mother and sister were victims of a serial killer. And now, without any bodies and with precious few clues, it's all too clear that a serial killer has found the key to the perfect murder . . . or Kimberly is chasing a crime that never happened.

Kimberly's caught in a web more lethal than any spider's, and the more she fights for answers, the more tightly she's trapped. What she doesn't know is that she's close—too close—to a psychopath who makes women's nightmares come alive, and if he has his twisted way, it won't be long before it's time for Kimberly to . . .

In the latest Kimberly Quincy thriller, the FBI special agent is five months pregnant. Most women might be thinking about taking things a bit easy, but not Quincy: not only is she still working full time but she also stumbles into what might be the biggest case of her career (and, as regular readers know, she has already tackled a few big ones). A serial killer is targeting young women. This in itself isn't so unusual, but here's the twist: he is, or so it appears, using spiders as murder weapons. Kimberly is convinced she is on the trail of a psychopath, but without any bodies or hard evidence, she is having a difficult time convincing her superiors she isn't on a wild-goose chase. In her last few novels, especially *Gone* (2006) and the excellent *Hide* (2007), Gardner has really hit her stride, and this one, if not her best, will surely be a surefire hit for her fans—and, in fact, for all readers who likes their thrillers suspenseful, fast paced, and just a little creepy (OK, a lot creepy). --David Pitt
