The Common Factors Model for Generalist Practice By Mark Cameron, Elizabeth King Keenan

Presents a new research-based model — The Common Factors Model — for generalist social work practice.

The Common Factors Model for Generalist Practice presents critical practice conditions and processes that research has suggested produce the most effective outcomes. These practice conditions include attributes of the social worker, clients, working relationships, supporting networks that influence and enable work, and the essential strategies social workers and clients engage in to facilitate change.

Part of the *Connecting Core Competencies Series*, the text guides students to use the common factors model for practice thinking, decision making, and evaluation.

Upon completing this book readers will be able to:

- Use the common factors model to think about generalist practice
- Understand how to apply the common factors model
- Discuss challenges to using the common factors model
- Consider how their personal values, knowledge, and tendencies support or inhibit practice

Editorial Review

Review

“The overall organization is wonderful...Starting out with key points as opposed to ending with key points helps focus the reading. The chapters flow well and are placed sequentially to build on each other.”

-Cynthia Faulkner, Morehead State University

“I appreciate there are specific skills highlighted [and] the "research moments" and also like how there are plenty of case examples.”

-Brian Flynn, Binghamton University

“Students like when information is presented in small chunks. The boxes, the diagrams and color all help the student grasp the concepts.”

-Michelle Alvarez, Minnesota State University-Mankato

About the Author

Mark Cameron is an associate professor at Southern Connecticut State University. He holds an MSSW and PhD from the Columbia University School of Social Work. He teaches generalist practice and his scholarship has been in the areas of community violence, school discipline, social work practice education, and the common factors approach.

Users Review

From reader reviews:

Jill Davis:

What do you concerning book? It is not important with you? Or just adding material when you want something to explain what you problem? How about your free time? Or are you busy particular person? If you don't have spare time to perform others business, it is make one feel bored faster. And you have free time? What did you do? Every person has many questions above. They need to answer that question due to the fact just their can do which. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on jardín de infancia until university need this The Common Factors Model for Generalist Practice to read.

Diego Mears:

Delaine Valencia:

As we know that book is important thing to add our information for everything. By a guide we can know everything we wish. A book is a list of written, printed, illustrated or blank sheet. Every year has been exactly added. This guide The Common Factors Model for Generalist Practice was filled with regards to science. Spend your spare time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading any book. If you know how big benefit from a book, you can feel enjoy to read a guide. In the modern era like today, many ways to get book that you just wanted.

Marjorie Calhoun:

As a scholar exactly feel bored to be able to reading. If their teacher expected them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's soul or real their interest. They just do what the instructor want, like asked to the library. They go to at this time there but nothing reading significantly. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this The Common Factors Model for Generalist Practice can make you sense more interested to read.
