Pathology of Pediatric Gastrointestinal and Liver Disease From Springer

Pathology of Pediatric Gastrointestinal and Liver Disease provides the pediatric pathologist, the GI or general pathologist, and the pediatric gastroenterologist with the most complete and current reference on the subject. With an emphasis on clinical-pathological correlation, the book includes in-depth discussions on disorders and issues that are frequently encountered but for which up-to-date information is often not readily available, as well as infrequent disorders unique or specific to children that are not covered in standard texts. Among the topics considered are malabsorption and motility disorders, immunodeficiencies, including AIDS, developmental malformations, food allergies, cystic diseases of the liver, hepatic tumors, and esophageal and pancreatic disorders. Many new illustrations and electron micrographs are included in this edition, and the high-quality endoscopic and radiographic images permit ready correlation with the pathologic principles under discussion.

Editorial Review

Review

From the book reviews:

“This is a worthy addition to the armamentarium of gastrointestinal and liver pathology books. It can be useful to both practicing pathologists and trainees who might encounter pediatric gastrointestinal and/or liver specimens The book has many excellent quality images, well organized tables, beautiful illustrations, and high quality discussions of a wide range of conditions.” (Deepthi S. Rao, Doody’s Book Reviews, April, 2015)

From the Back Cover

Pediatric gastrointestinal and liver biopsies account for a significant portion of the specimens examined by a pathology laboratory. The increasingly widespread use of endoscopic procedures in children, the improved sophistication of medical imaging techniques, and the exciting expansion of knowledge in genetic medicine have all led to new advances and opportunities in pediatric hepatogastroenterology and pathology.

Pathology of Pediatric Gastrointestinal and Liver Disease provides the pediatric pathologist, the GI or general pathologist, and the pediatric gastroenterologist with the most complete and current reference on the subject. With an emphasis on clinical-pathological correlation, the book includes in-depth discussions on disorders and issues that are frequently encountered but for which up-to-date information is often not readily available, as well as infrequent disorders unique or specific to children that are not covered in standard texts. Significant revision has been undertaken since the first edition, with the inclusion of many new illustrations and electron micrographs. Among the topics covered are malabsorption and motility disorders, immunodeficiencies, including HIV, developmental malformations, food allergies, cystic diseases of the liver, hepatic tumors, and esophageal and pancreatic disorders. The book is richly illustrated, with many figures in color, and the high-quality endoscopic and radiographic images permit ready correlation with the pathologic principles under discussion.

About the Author

Pierre A. Russo, MD, is Professor of Pathology and Laboratory Medicine at the University of Pennsylvania School of Medicine and Director of Anatomic Pathology, at the Children's Hospital of Philadelphia. In the latter role he oversees a staff of 40 staff pathologists and technicians and trains fellows and residents in pediatric pathology. Additionally, Professor Russo is Co-Chair of the Pathology Committee for the Childhood Liver Disease Research and Education Network (ChiLDREN). He is board certified by the American Board of Pathology/Anatomic and Clinical Pathology and the American Board of Pathology/Pediatric Pathology. His main interest is the pathology of hepatobiliary and digestive disorders in children, and his research has in particular focused on the mechanisms of cholestasis and on bile duct disorders.

Eduardo Ruchelli, MD, is Associate Professor of Pathology and Laboratory Medicine at the University of Pennsylvania School of Medicine, and Attending Pathologist as well as Director of the Pediatric Pathology

Fellowship Program at the Children's Hospital of Philadelphia. He is board certified by the American Board of Pathology/Anatomic and Clinical Pathology and the American Board of Pathology/Pediatric Pathology. His special interests include fetal and perinatal pathology, pathologic evaluation of the pancreas in congenital hyperinsulinism, and eosinophilic esophagitis. He has published widely on these and other subjects in peer-reviewed journals.

David Piccoli, MD, is Professor of Pediatrics at the University of Pennsylvania School of Medicine and Chief of the Division of Gastroenterology, Hepatology, and Nutrition at the Children's Hospital of Philadelphia. He is also Director of the Fred and Suzanne Biesecker Pediatric Liver Center and Associate Chair for Information, Department of Pediatrics, The Children's Hospital of Philadelphia. He is board certified by the American Board of Pediatrics and the American Board of Pediatrics/Pediatric Gastroenterology. His special interests include Alagille syndrome, bile duct disorders, and inflammatory bowel disease, and he has published extensively on these and other topics. Professor Piccoli has also been the recipient of various awards, including the Outstanding Leadership Award from the Crohn's and Colitis Foundation of America.

Users Review

From reader reviews:

Joan Myers:

Playing with family inside a park, coming to see the coastal world or hanging out with friends is thing that usually you could have done when you have spare time, after that why you don't try thing that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Pathology of Pediatric Gastrointestinal and Liver Disease, you could enjoy both. It is good combination right, you still need to miss it? What kind of hang-out type is it? Oh can happen its mind hangout men. What? Still don't buy it, oh come on its referred to as reading friends.

Henry Knight:

Do you have something that you prefer such as book? The book lovers usually prefer to pick book like comic, small story and the biggest you are novel. Now, why not attempting Pathology of Pediatric Gastrointestinal and Liver Disease that give your fun preference will be satisfied by reading this book. Reading behavior all over the world can be said as the opportunity for people to know world a great deal better then how they react towards the world. It can't be said constantly that reading routine only for the geeky man but for all of you who wants to possibly be success person. So , for every you who want to start reading through as your good habit, you could pick Pathology of Pediatric Gastrointestinal and Liver Disease become your starter.

Sharon Clayton:

This Pathology of Pediatric Gastrointestinal and Liver Disease is great guide for you because the content that is certainly full of information for you who also always deal with world and get to make decision every minute. This kind of book reveal it details accurately using great arrange word or we can say no rambling

sentences included. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but tricky core information with attractive delivering sentences. Having Pathology of Pediatric Gastrointestinal and Liver Disease in your hand like getting the world in your arm, info in it is not ridiculous 1. We can say that no reserve that offer you world in ten or fifteen small right but this reserve already do that. So , this can be good reading book. Hello Mr. and Mrs. hectic do you still doubt which?

Nancy Kidder:

Is it anyone who having spare time then spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Pathology of Pediatric Gastrointestinal and Liver Disease can be the solution, oh how comes? It's a book you know. You are and so out of date, spending your extra time by reading in this fresh era is common not a nerd activity. So what these publications have than the others?
