Model Predictive Control Schemes For Autonomous Ground Vehicle By Solomon S. Oyelere

The application of Model Predictive Control (MPC) to fast systems like autonomous ground vehicles (AGV) or mobile robots is thoroughly investigated in this book. The control of Autonomous ground vehicles (AGV) is challenging because of nonholonomic constraints, uncertainties, speed and accuracy of controls and the vehicle's terrain of operation. This work develops a Model Predictive Control (MPC) algorithm for the autonomous ground vehicle (AGV).
