Climate Change and the Crisis of Capitalism: A Chance to Reclaim, Self, Society and Nature (Routledge Studies in Human Geography) From Routledge

Are established economic, social and political practices capable of dealing with the combined crises of climate change and the global economic system? Will falling back on the wisdoms that contributed to the crisis help us to find ways forward or simply reconfigure risk in another guise? This volume argues that the combination of global environmental change and global economic restructuring require a re-thinking of the priorities, processes and underlying values that shape contemporary development aspirations and policy.

This volume brings together leading scholars to address these questions from several disciplinary perspectives: environmental sociology, human geography, international development, systems thinking, political sciences, philosophy, economics and policy/management science. The book is divided into four sections that examine contemporary development discourses and practices. It bridges geographical and disciplinary divides and includes chapters on innovative governance that confront unsustainable economic and environmental relations in both developing and developed contexts. It emphasises the ways in which dominant development paths have necessarily forced a separation of individuals from nature, but also from society and even from 'self'. These three levels of alienation each form a thread that runs through the book. There are different levels and opportunities for a transition towards resilience, raising questions surrounding identity, governance and ecological management. This places resilience at the heart of the contemporary crisis of capitalism, and speaks to the relationship between the increasingly global forms of economic development and the difficulties in framing solutions to the environmental problems that carbon-based development brings in its wake.. Existing social science can help in not only identifying the challenges but also potential pathways for making change locally and in wider political, economic and cultural systems, but it must do so by identifying transitions out of carbon dependency and the kind of political challenges they imply for reflexive individuals and

alternative community approaches to human security and wellbeing.

Climate Change and the Crisis of Capitalism contains contributions from leading scholars to produce a rich and cohesive set of arguments, from a range of theoretical and empirical viewpoints. It analyses the problem of resilience under existing circumstances, but also goes beyond this to seek ways in which resilience can provide a better pathway and template for a more sustainable future. This volume will be of interest to both undergraduate and postgraduate students studying Human Geography, Environmental Policy, and Politics.

Editorial Review

About the Author

Mark Pelling is a Professor of Geography at King's College, London. His research specialism is adaptation to climate change, in developing countries and more recently in the UK and Europe.

David Manuel-Navarrete is a Senior Research Associate at King's College, London and a Visiting Researcher at desiguALdade.net (Free University of Berlin and Ibero-American Institute), where he studies spatial inequalities created by global tourism in the Mexican Caribbean.

Michael Redclift is Professor of International Environmental Policy at King's College, London. His research interests include sustainable development, global environmental change, environmental security and the modern food system.

Users Review

From reader reviews:

Rita Dubois:

Reading a publication can be one of a lot of task that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people fantastic. First reading a book will give you a lot of new info. When you read a book you will get new information mainly because book is one of many ways to share the information or even their idea. Second, examining a book will make anyone more imaginative. When you looking at a book especially fictional book the author will bring that you imagine the story how the characters do it anything. Third, you are able to share your knowledge to some others. When you read this **Climate Change and the Crisis of Capitalism: A Chance to Reclaim, Self, Society and Nature (Routledge Studies in Human Geography)**, you may tells your family, friends along with soon about yours reserve. Your knowledge can inspire others, make them reading a e-book.

Kyle Guthrie:

Do you have something that you enjoy such as book? The guide lovers usually prefer to choose book like comic, short story and the biggest you are novel. Now, why not striving **Climate Change and the Crisis of Capitalism: A Chance to Reclaim, Self, Society and Nature (Routledge Studies in Human Geography)** that give your satisfaction preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the way for people to know world much better then how they react when it comes to the world. It can't be stated constantly that reading practice only for the geeky person but for all of you who wants to become success person. So , for all you who want to start studying as your good habit, you can pick **Climate Change and the Crisis of Capitalism: A Chance to Reclaim, Self, Society and Nature (Routledge Studies in Human Geography)** become your own starter.

Warren Cruz:

That reserve can make you to feel relax. This kind of book *Climate Change and the Crisis of Capitalism: A Chance to Reclaim, Self, Society and Nature* (Routledge Studies in Human Geography) was bright colored and of course has pictures around. As we know that book *Climate Change and the Crisis of Capitalism: A Chance to Reclaim, Self, Society and Nature* (Routledge Studies in Human Geography) has many kinds or genre. Start from kids until young adults. For example *Naruto* or *Private investigator Conan* you can read and think you are the character on there. Therefore , not at all of book are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading in which.

Brenda Cornell:

As a pupil exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some book, they are complained. Just minor students that has reading's soul or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring as well as can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this *Climate Change and the Crisis of Capitalism: A Chance to Reclaim, Self, Society and Nature* (Routledge Studies in Human Geography) can make you experience more interested to read.
