Multivariable Calculus (Briggs/Cochran Calculus) By Bill Briggs, Lyle Cochran

Drawing on their decades of teaching experience, William Briggs and Lyle Cochran have created a calculus text that carries the teacher's voice beyond the classroom. That voice—evident in the narrative, the figures, and the questions interspersed in the narrative—is a master teacher leading readers to deeper levels of understanding. The authors appeal to readers' geometric intuition to introduce fundamental concepts and lay the foundation for the more rigorous development that follows. Comprehensive exercise sets have received praise for their creativity, quality, and scope.

Note: This is the standalone book if you want the book/access card order the ISBN below:

0321665880 / 9780321665881 Multivariable Calculus Plus MyMathLab -- Access Card Package

Package consists of:

0321431308 / 9780321431301 MyMathLab/MyStatLab -- Glue-in Access Card

0321654064 / 9780321654069 MyMathLab Inside Star Sticker

0321664159 / 9780321664150 Multivariable Calculus

Editorial Review

From the Back Cover

Drawing on their decades of teaching experience, William Briggs and Lyle Cochran have created a calculus text that carries the teacher's voice beyond the classroom. That voice-evident in the narrative, the figures, and the questions interspersed in the narrative-is a master teacher leading readers to deeper levels of understanding. The authors appeal to readers' geometric intuition to introduce fundamental concepts and lay the foundation for the more rigorous development that follows. Comprehensive exercise sets have received praise for their creativity, quality, and scope.

Sequences and Infinite Series; Power Series; Parametric and Polar Curves; Vectors and Vector-Valued Functions; Functions of Several Variables; Multiple Integration; Vector Calculus.

For all readers interested in single variable and multivariable calculus for mathematics, engineering, and science.

About the Author

William Briggs has been on the mathematics faculty at the University of Colorado at Denver for twenty-three years. He received his BA in mathematics from the University of Colorado and his MS and PhD in applied mathematics from Harvard University. He teaches undergraduate and graduate courses throughout the mathematics curriculum with a special interest in mathematical modeling and differential equations as it applies to problems in the biosciences. He has written a quantitative reasoning textbook, *Using and Understanding Mathematics*; an undergraduate problem solving book, *Ants, Bikes, and Clocks*; and two tutorial monographs, *The Multigrid Tutorial* and *The DFT: An Owner's Manual for the Discrete Fourier Transform*. He is the Society for Industrial and Applied Mathematics (SIAM) Vice President for Education, a University of Colorado President's Teaching Scholar, a recipient of the Outstanding Teacher Award of the Rocky Mountain Section of the Mathematical Association of America (MAA), and the recipient of a Fulbright Fellowship to Ireland.

Lyle Cochran is a professor of mathematics at Whitworth University in Spokane, Washington. He holds BS degrees in mathematics and mathematics education from Oregon State University and a MS and PhD in mathematics from Washington State University. He has taught a wide variety of undergraduate mathematics courses at Washington State University, Fresno Pacific University, and, since 1995, at Whitworth University. His expertise is in mathematical analysis, and he has a special interest in the integration of technology and mathematics education. He has written technology materials for leading calculus and linear algebra textbooks including the *Instructor's Mathematica Manual for Linear Algebra and Its Applications* by David C. Lay and the *Mathematica Technology Resource Manual for Thomas' Calculus*. He is a member of the MAA and a former chair of the Department of Mathematics and Computer Science at Whitworth University.

Users Review

From reader reviews:

Jane Nelsen:

Do you have favorite book? When you have, what is your favorite's book? Publication is very important

thing for us to know everything in the world. Each publication has different aim or perhaps goal; it means that publication has different type. Some people really feel enjoy to spend their time to read a book. They are really reading whatever they consider because their hobby will be reading a book. How about the person who don't like reading through a book? Sometime, person feel need book when they found difficult problem or even exercise. Well, probably you will want this Multivariable Calculus (Briggs/Cochran Calculus).

Teresa Hennessey:

Book is usually written, printed, or outlined for everything. You can understand everything you want by a reserve. Book has a different type. We all know that that book is important factor to bring us around the world. Beside that you can your reading skill was fluently. A reserve Multivariable Calculus (Briggs/Cochran Calculus) will make you to end up being smarter. You can feel much more confidence if you can know about every little thing. But some of you think which open or reading some sort of book make you bored. It isn't make you fun. Why they are often thought like that? Have you trying to find best book or suited book with you?

Caitlin Cruz:

This Multivariable Calculus (Briggs/Cochran Calculus) usually are reliable for you who want to be described as a successful person, why. The main reason of this Multivariable Calculus (Briggs/Cochran Calculus) can be among the great books you must have is actually giving you more than just simple reading food but feed an individual with information that might be will shock your preceding knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions in e-book and printed ones. Beside that this Multivariable Calculus (Briggs/Cochran Calculus) forcing you to have an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we know it useful in your day exercise. So , let's have it and enjoy reading.

Sheila Collins:

Spent a free time to be fun activity to try and do! A lot of people spent their sparetime with their family, or their particular friends. Usually they accomplishing activity like watching television, planning to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Can be reading a book might be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to try look for book, may be the publication untitled Multivariable Calculus (Briggs/Cochran Calculus) can be excellent book to read. May be it may be best activity to you.
