**High Noon for Natural Gas: The New Energy Crisis** By Julian Darley, Richard Heinberg

Blackouts, rising gas prices, changes to the Clean Air Act, proposals to open wilderness and protected offshore areas to gas drilling, and increasing dependence on natural gas for electricity generation. What do all these developments have in common, and why should we care?

In this timely expose, author Julian Darley takes a hard-hitting look at natural gas as an energy source that rapidly went from nuisance to crutch. Darley outlines the implications of our increased dependence on this energy source and why it has the potential to cause serious environmental, political, and economic consequences. *In High Noon for Natural Gas* readers can expect to find a critical analysis of government policy on energy, as well as a meticulously researched warning about our next potentially catastrophic energy crisis.

Did you know that:

- Natural Gas (NG) is the second most important energy source after oil
- In the U.S. alone, NG is used to supply 20% of all electricity and 60% of all home heating
- NG is absolutely critical to the manufacture of agricultural fertilizers
- In the U.S. the NG supply is at critically low levels, and early in 2003 we came within days of blackouts and heating shutdowns
- Matt Simmons, the world's foremost private energy banker, is now warning that economic growth in the U.S. is under threat due to the looming NG crisis?

### Editorial Review

Review

#### *Choice-*

Darley, an environmental researcher in the UK, offers a fresh look at a fuel that is widely misunderstood. Although it is essentially methane, natural gas has been considered a waste byproduct, a prime fuel, a major source for fertilizer, a political football, and a short- or a long-term solution for the energy problem. The author assesses each of these conflicting views and shows the economic, environmental, and political dilemmas that must be reconciled. The electric power industry embraced gas to rid itself of the problems inherent with coal. Environmentalists were impressed with how clean natural gas burned. Economists liked the low relative costs. These are all flawed conclusions, and this author's thesis is that a massive worldwide conservation effort is the only viable future course of action. Given the world's political jumble, he is not hopeful. Extensive notes are included. Summing Up: Recommended. All levels.

(J.C. Comer, emeritus, Northern Illinois University)

"What's that hissing sound? Worried about oil running out? Don't look now, but natural gas is next on the endangered hydrocarbons list."--**Salon.com**

From the Publisher

Blackouts, rising gas prices, changes to the Clean Air Act, proposals to open wilderness to gas drilling and increasing dependence on natural gas for electricity generation. What do all these things have in common, and why should we care?

In this timely expose, author Julian Darley takes a hard-hitting look at natural gas as an energy source that rapidly went from nuisance to crutch. Darley outlines the implications of our increased dependence on natural gas and why it has the potential to cause serious environmental, political, and economic consequences. *High Noon For Natural Gas* is a critical analysis of government policy on energy, as well as a meticulously researched warning about our next potentially catastrophic energy crisis.

About the Author

Julian Darley is a British environmental researcher who writes about nonmarket and non-technology-based responses to global environmental degradation. He runs an Internet broadcasting station ([www.resilience.org](http://www.resilience.org)), develops Open Source web database sites for nonprofits and civil society organizations, and is currently writing a book on how and why we need "global relocalization" of the economy, society and culture. Julian lives in Vancouver, Canada.

Richard Heinberg is Senior Fellow at the Post Carbon Institute. He is the author of several influential books on resource depletion including *Peak Everything: Waking Up to the Century Of Declines*.

## **Users Review**

### **From reader reviews:**

#### **Gary Landrum:**

The book High Noon for Natural Gas: The New Energy Crisis can give more knowledge and also the precise product information about everything you want. Why then must we leave the great thing like a book High Noon for Natural Gas: The New Energy Crisis? A number of you have a different opinion about guide. But one aim which book can give many information for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or info that you take for that, you may give for each other; it is possible to share all of these. Book High Noon for Natural Gas: The New Energy Crisis has simple shape but the truth is know: it has great and big function for you. You can search the enormous world by available and read a guide. So it is very wonderful.

#### **Constance Music:**

Reading a publication tends to be new life style in this particular era globalization. With studying you can get a lot of information that will give you benefit in your life. Using book everyone in this world can share their idea. Publications can also inspire a lot of people. A great deal of author can inspire their reader with their story or perhaps their experience. Not only the storyline that share in the ebooks. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors these days always try to improve their expertise in writing, they also doing some analysis before they write to the book. One of them is this High Noon for Natural Gas: The New Energy Crisis.

#### **Randy Mosley:**

In this time globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher that print many kinds of book. The particular book that recommended for you is High Noon for Natural Gas: The New Energy Crisis this guide consist a lot of the information from the condition of this world now. This specific book was represented how do the world has grown up. The language styles that writer use to explain it is easy to understand. The writer made some study when he makes this book. That is why this book ideal all of you.

#### **Mildred Brummett:**

Book is one of source of information. We can add our know-how from it. Not only for students and also native or citizen will need book to know the change information of year for you to year. As we know those textbooks have many advantages. Beside most of us add our knowledge, could also bring us to around the world. From the book High Noon for Natural Gas: The New Energy Crisis we can get more advantage. Don't you to definitely be creative people? Being creative person must like to read a book. Merely choose the best book that acceptable with your aim. Don't become doubt to change your life with that book High Noon for

Natural Gas: The New Energy Crisis. You can more desirable than now.
