Postphenomenological Investigations: Essays on Human–Technology Relations (Postphenomenology and the Philosophy of Technology) From Ingramcontent

Postphenomenological Investigations: Essays on Human–Technology Relations provides an introduction to the school of thought called postphenomenology and showcases projects at the cutting edge of this perspective. Postphenomenology presents a unique blend of insights from the philosophical traditions of phenomenology and American pragmatism, and applies them to studies of user relations to technologies. These studies provide deep descriptions of the ways technologies transform our abilities, augment our experience, and shape the world around us. This book proceeds with a preface by Don Ihde, postphenomenology's founder, and a detailed review of the main ideas of this perspective by the editors Robert Rosenberger and Peter-Paul Verbeek. The body of this volume is composed of twelve postphenomenological essays which reflect the expansive range, detail-orientation, and interdisciplinarity of this school of thought. These essays confront a broad assortment of topics, both abstract and concrete. Abstract topics addressed include metaphysics, ethics, methodology, and analysis of the notions of selfhood, skill training, speed, and political activism. Just a few of the concrete topics studied include human-like interactive robots, ethics education, image interpretation in radiology, science fiction tropes, transportation history, wearable computing, and organ donation protocols for brain-dead bodies. The volume concludes with constructive critiques of postphenomenology by Andrew Feenberg, Diane Michelfelder, and Albert Borgmann, all figures whose work is relevant to postphenomenological projects.

Editorial Review

Review

This collection provides an excellent overview of current work in one of the most important current approaches to the philosophy of technology. . . .The editors' summaries of the sixteen essays provide the reader with a helpful roadmap of the book's organization and content. . . .This is a well-conceived and articulated book and certainly one that both advances studies in the philosophy of technology and contributes to new ways of thinking about phenomenology. (*Notre Dame Philosophical Reviews*)

[The book] is well referenced, and key texts are well signposting, meaning that a lateral rather than linear read may be more productive for newcomers to postphenomenology. (*Centre for Medical Humanities*)

This book is a major contribution to the sparse body of knowledge in the Western philosophical tradition dealing with the foundations of a field of scholarly research. Here the case is so-called postphenomenology, which owes so much to Don Ihde, who provides a brilliant introduction. The two co-editors are equally important, and represent researchers in both the United States and Europe, whose contributions constitute much of the volume. (Paul Durbin, University of Delaware)

This anthology is an absolute must for newcomers as well as those versed in the field and its discussions. The book shows how far the burgeoning field of postphenomenological analysis has come since the broader and largely technology-deterministic approaches made by the phenomenological predecessors, most prominently Martin Heidegger. Both novices and those already acquainted with this philosophical style of analysis get plenty of new food for thought in essays addressing technological agency, speed, ethics, humanoid robots, bodies, science fiction, politics, philosophy of design, and scientific practice, as well as a number of brilliantly executed and informative case studies. (Cathrine Hasse, University of Aarhus)

About the Author

Robert Rosenberger is assistant professor of philosophy at the Georgia Institute of Technology.

Peter-Paul Verbeek is professor of philosophy of technology and chair of the Philosophy Department at the University of Twente.

Users Review

From reader reviews:

John Hickman:

What do you think about book? It is just for students because they're still students or this for all people in the world, the actual best subject for that? Only you can be answered for that problem above. Every person has different personality and hobby for every other. Don't to be obligated someone or something that they don't need do that. You must know how great and important the book Postphenomenological Investigations: Essays on Human–Technology Relations (Postphenomenology and the Philosophy of Technology). All type of book are you able to see on many methods. You can look for the internet methods or other social media.

Martha Albarado:

A lot of people always spent all their free time to vacation or maybe go to the outside with them loved ones or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. In order to try to find a new activity that is look different you can read any book. It is really fun for you. If you enjoy the book you read you can spent 24 hours a day to reading a e-book. The book Postphenomenological Investigations: Essays on Human–Technology Relations (Postphenomenology and the Philosophy of Technology) it is quite good to read. There are a lot of people who recommended this book. They were enjoying reading this book. In case you did not have enough space to create this book you can buy the actual e-book. You can m0ore easily to read this book from the smart phone. The price is not to fund but this book provides high quality.

Chester Hassel:

Many people spending their time frame by playing outside along with friends, fun activity using family or just watching TV all day every day. You can have new activity to spend your whole day by examining a book. Ugh, ya think reading a book can actually hard because you have to take the book everywhere? It all right you can have the e-book, getting everywhere you want in your Cell phone. Like Postphenomenological Investigations: Essays on Human–Technology Relations (Postphenomenology and the Philosophy of Technology) which is obtaining the e-book version. So , why not try out this book? Let's view.

Clara Williams:

Is it a person who having spare time in that case spend it whole day by simply watching television programs or just laying on the bed? Do you need something new? This Postphenomenological Investigations: Essays on Human–Technology Relations (Postphenomenology and the Philosophy of Technology) can be the respond to, oh how comes? It's a book you know. You are so out of date, spending your spare time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?
