**Connect Access Card for Exploring Physical Geography** By Stephen Reynolds, Julia Johnson, Mark Andrew Francek Professor, Peter Waylen Professor, Robert V. Rohli Professor

McGraw-Hill Connect® is a subscription-based learning service accessible online through your personal computer or tablet. Choose this option if your instructor will require Connect to be used in the course. Your subscription to Connect includes the following:

- SmartBook® - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you are learning the content.
- Access to your instructor's homework assignments, quizzes, syllabus, notes, reminders, and other important files for the course.
- Progress dashboards that quickly show how you are performing on your assignments and tips for improvement.
- The option to purchase (for a small fee) a print version of the book. This binder-ready, loose-leaf version includes free shipping.

Complete system requirements to use Connect can be found here:

## **Editorial Review**

### About the Author

Stephen J. Reynolds is the author of the highly successful *Exploring Geology*, Stephen Reynolds is bringing his innovation and strong visual content to *Exploring Physical Geography*. Stephen J. Reynolds received an undergraduate degree from the University of Texas at El Paso, and M.S. and Ph.D. degrees in geosciences from the University of Arizona. He then spent ten years directing the geologic framework and mapping program of the Arizona Geological Survey, completing a new Geologic Map of Arizona. Steve currently is a professor in the School of Earth and Space Exploration at Arizona State University, where he has taught various courses about regional geology, earth resources, evolution of landscapes, field studies, and teaching methods. As a National Association of Geoscience Teachers (NAGT) distinguished speaker, he traveled across the country presenting talks and workshops on how to infuse active learning and inquiry into large introductory geology classes. He is commonly an invited speaker to national workshops and symposia on active learning, visualization, and teaching.

Mark Francek is a geography professor at Central Michigan University (CMU). Before coming to CMU in 1988, Francek earned his doctorate in geography from the University of Wisconsin-Milwaukee, his master's in geography from the University of South Carolina, and his bachelor's degree in geography and psychology from the State University College at Geneseo, New York. He has teaching and research interests in earth science education, physical geography, and soil science. Mark has pedaled twice across America and teaches biking geography field classes in around the Great Lakes region and Appalachian Mountains. He has authored and coauthored more than 30 scholarly papers, funded in part by the NSF and the State of Michigan, and has presented his research at numerous national and state conferences. At CMU, Francek has served as acting director of the Environmental Studies Program and Director of the Science and Technology Residential College.

Peter Waylen is Robin and Jean Gibson Professor of Geography at the University of Florida. He holds a B.Sc. in Geography from the London School of Economics, England, and a Ph.D. from McMaster University, Canada. He has also served as Assistant Professor at the University of Saskatchewan, visiting Associate Professor at the University of Waterloo, Canada, Hartley Visiting Research Fellow at the University of Southampton, England, and Visiting Scholar in the Department of Engineering Hydrology, University College Galway, Ireland. His teaching and research interests are in the fields of hydrology and climatology, particularly the temporal and spatial variability of risks of such hazards as floods, droughts, freezes, and heat waves, and the way in which these vary in the long run, driven by global scale phenomenon like ENSO. He has worked throughout Anglo- and Latin America, and several parts of Africa. He teaches *Introductory Physical Geography*, *Principles of Geographic Hydrology*, and *Models in Hydrology*, and was selected University of Florida Teacher of the Year in 2002.

Julia K. Johnson is currently a full-time faculty member in the School of Earth and Space Exploration at Arizona State University. Her M.S. and Ph.D. research involved structural geology and geoscience education research. The main focus of her geoscience education research is on student- and instructor-generated sketches for learning, teaching, and assessment in college geology classes. Prior to coming to ASU, she did groundwater studies of copper deposits and then taught full time in the Maricopa County Community College District, teaching *Physical Geology*, *Environmental Geology*, and their labs. At ASU, she teaches *Introduction to Geology* to nearly 1,000 students per year and supervises the associated introductory geology

labs. She also coordinates the introductory geology teaching efforts of the School of Earth and Space Exploration, helping other instructors incorporate active learning and inquiry into large lecture classes.

Robert Rohli received a B.A. in geography from the University of New Orleans, an M.S. degree in atmospheric sciences from The Ohio State University, and a Ph.D. in geography from Louisiana State University (LSU). He is currently in his 14th year at LSU, with his time is divided between Faculty Director of the LSU Residential Colleges Program and Professor of Geography. Previously, he served as Assistant Professor of Geography at Kent State University (KSU) and as Regional Climatologist at the Southern Regional Climate Center. His teaching and research interests are in physical geography, particularly synoptic and applied meteorology/climatology, atmospheric circulation variability, and hydroclimatology. He has taught Physical Geography, Climatology, Meteorology, Physical Climatology, World Climates, Methods in Synoptic Climatology, Applied Meteorology, Analysis of Spatial Data, Water Resources Geography, and others.

## **Users Review**

### **From reader reviews:**

#### **Ashley Parra:**

What do you about book? It is not important with you? Or just adding material when you require something to explain what yours problem? How about your spare time? Or are you busy particular person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have free time? What did you do? All people has many questions above. They should answer that question because just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is appropriate. Because start from on pre-school until university need this specific Connect Access Card for Exploring Physical Geography to read.

#### **Donna Casey:**

Do you certainly one of people who can't read satisfying if the sentence chained from the straightway, hold on guys this kind of aren't like that. This Connect Access Card for Exploring Physical Geography book is readable by you who hate those perfect word style. You will find the information here are arrange for enjoyable studying experience without leaving perhaps decrease the knowledge that want to provide to you. The writer involving Connect Access Card for Exploring Physical Geography content conveys the thought easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different as it. So , do you nonetheless thinking Connect Access Card for Exploring Physical Geography is not loveable to be your top list reading book?

#### **Mary Crouch:**

This book untitled Connect Access Card for Exploring Physical Geography to be one of several books that best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit on it. You will easily to buy this book in the book retail outlet or you can order it through online. The publisher in this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Cell phone. So there is no reason to your account to past this guide from your list.

**Timothy Rhine:**

Don't be worry for anyone who is afraid that this book can filled the space in your house, you will get it in e-book technique, more simple and reachable. This kind of Connect Access Card for Exploring Physical Geography can give you a lot of good friends because by you investigating this one book you have factor that they don't and make you actually more like an interesting person. This kind of book can be one of a step for you to get success. This guide offer you information that maybe your friend doesn't know, by knowing more than various other make you to be great folks. So , why hesitate? We should have Connect Access Card for Exploring Physical Geography.
