Double Bubble Universe: The Layout (Double Bubble TOE) (Volume 1) By Katya Walter PhD

Double Bubble Universe: The Layout is Volume 1, Third Edition, in the sensational DOUBLE BUBBLE TOE series. Is this science fiction? Some would say so. Science and mysticism merge in this stunning new paradigm! Western science explores cosmology. Ancient China's I Ching follows the Tao. They merge in a master code that spans DNA, superstrings, gravitons, fractals, and chaos theory. Is this science fiction? No, it isn't. Science and mysticism merge in this stunning new paradigm! Dr. Katya Walter takes you into the fractal double bubble universe! This book heals the 2,500-year split between body and mind. Called in Germany a "philosopher queen of the global village," Dr. Walter embraces East and West to unite our planet. She merges left-brain accuracy with right-brain vision in a clear voice of wisdom. Volume 1 overviews the Double Bubble universe, its layout and functions. It has 17 chapters in 102 sections, a Series Summary, Bibliography, and Reviews. It has 53 listed images, graphics, and charts. The ebook version uses color graphics with greater distinctions, its text is completely searchable with an interactive table of contents, and it adds 45 e-links that amplify the materials. What if our universe is really a giant double bubble? The laws of physics allow it...and it solves many puzzles in current science. The two huge bubbles are conjoined mirror twins existing above and below the Planck level scale of reality. Our familiar bubble above the Planck level has 3D space and the arrow of time - what we call spacetime. It holds matter, energy, and the known pole of gravity. Many mini-minds (like ours, for instance) inhabit the gracious 3D space and constricted time of the upper bubble. But that other bubble hidden below the Planck level has 3D time and the arrow of space - call it timespace. It holds antimatter, tachyonic energy, and the lost pole of gravity unknown to current physics. Its shape is due to by a Lorenz attractor-like dynamic that creates the two bubbles. A membrane interface of many tiny cells joins the two bubbles. At this tiny scale where space and time are made arises its ongoing solution of continually emergent reality. This holographically projects two bubbles - one with 3D space and an arrow of time in the upper bubble; the other with 3D time and an arrow of space in the lower bubble. Together the two arrows stretch a polarized 1D axis across both bubbles. Many tiny walkabout minds exist in the upper bubble. They are powered by electrical energy. A single unified mind dwells in the lower bubble...powered by zippy

tachyonic energy in a vast cloud throughout 3D time. That great mind down there and our tiny minds up here influence the continual chaotic flow of events...subject to abrupt, seemingly random changes, but they emerge in a nonlinear progression of chaos patterning. Along with scientific concepts, Dr. Walter also describes metaphysical parallels and tells a dream that inspired this series. Praise for Double Bubble Universe “Katya Walter’s Double Bubble Universe integrates immense questions and insightful answers about the cosmos. She uses data, analogies, images, and stories that resolve together into one bubbling statement. A must read....” Rowena Pattee Kryder, author of Dynamics & Foundations of Co-Creation “I can’t decide if this is sci-fi, fact, or psi-phy. Whatever, it is truly fascinating. A brain gym of possibilities!” Frank Patterson, former aero-space engineer “I find this series the most promising of all the TOEs being proposed currently. It involves a new topological model spanning all levels of reality and “deep see diving” into fractal pattern recognition. It answers far-reaching questions. This model deserves careful reading by the best minds of our time.” Oliver Markley, Ph.D., Prof. Emeritus of Human Sciences & Future Studies
