Embedded Hardware: Know It All (Newnes Know It All) By Jack Ganssle, Tammy Noergaard, Fred Eady, David J. Katz, Rick Gentile, Ken Arnold, Kamal Hyder, Bob Perrin

The Newnes Know It All Series takes the best of what our authors have written to create hard-working desk references that will be an engineer's first port of call for key information, design techniques and rules of thumb. Guaranteed not to gather dust on a shelf!

Circuit design using microcontrollers is both a science and an art. This book covers it all. It details all of the essential theory and facts to help an engineer design a robust embedded system. Processors, memory, and the hot topic of interconnects (I/O) are completely covered. Our authors bring a wealth of experience and ideas; this is a must-own book for any embedded designer.

*A 360 degree view from best-selling authors including Jack Ganssle, Tammy Noergard, and Fred Eady

*Key facts, techniques, and applications fully detailed

*The ultimate hard-working desk reference: all the essential information, techniques, and tricks of the trade in one volume

Editorial Review

Review

"The authors know their subject and present it well. Examples include C and BASIC code that will run on a PIC12F675 microcontroller."

"If you want information about the overall aspects of embedded-system design, this book deserves a look."

"David Katz and Rick Gentile of Analog Devices do an admirable job covering memory architectures and storage technologies and devices."

"The authors know their subject and present it well."

ECN

About the Author

Jack Ganssle has 30 years' experience developing embedded systems. He has authored two books, *The Art of Programming Embedded Systems* and *The Art of Designing Embedded Systems*, and writes a regular column in *Embedded Systems Programming* magazine. **Michael Barr** is the editor-in-chief of *Embedded Systems Programming* magazine and the principal of Neutrino Consultants Network. He wrote *Programming Embedded Systems in C and C++*.

Tammy Noergaard is Chief Specialist in Embedded Systems at Terma, Denmark. Tammy has a wealth of professional experience including Technical Lead/Manager (Denmark) at Vestas Wind Systems A/S, independent consultancy in systems engineering and as a Field Engineering Specialist for two Silicon Valley-based corporations. She has also worked as a software engineer with Sony Electronics and Hyundai.

As an engineering consultant, Fred Eady has implemented communications networks for the space program and designed hardware and firmware for the medical, retail and public utility industries. He currently writes a monthly embedded design column for a popular electronics enthusiast magazine. Fred also composes monthly articles for a popular robotics magazine. Fred has been dabbling in electronics for over 30 years. His embedded design expertise spans the spectrum and includes Intel's 8748 and 8051 microcontrollers, the entire Microchip PIC microcontroller family and the Atmel AVR microcontrollers. Fred recently retired from his consulting work and is focused on writing magazine columns and embedded design books.

Lewin Edwards is an embedded engineer with over 15 years experience designing embedded systems hardware, firmware, and control software.

Rick Gentile joined ADI in 2000 as a Senior DSP Applications Engineer, and he currently leads the Processor Applications Group, which is responsible for Blackfin, SHARC and TigerSHARC processors. Prior to joining ADI, Rick was a Member of the Technical Staff at MIT Lincoln Laboratory, where he designed several signal processors used in a wide range of radar sensors. He has authored dozens of articles and presented at multiple technical conferences. He received a B.S. in 1987 from the University of Massachusetts at Amherst and an M.S. in 1994 from Northeastern University, both in Electrical and Computer Engineering.

Ken Arnold is the founder and former president of Paragon Engineering Services, Houston, Texas. He has more than 40 years of experience in the operations and project management. He is actively involved in production facility design. He has served on numerous SPE, API, and government advisory committees as an expert on oil handling, produced-water treating, and safety aspects producing operations.

Users Review

From reader reviews:

Sybil Davis:

Typically the book Embedded Hardware: Know It All (Newnes Know It All) has a lot of info on it. So when you read this book you can get a lot of gain. The book was written by the very famous author. This author makes some research prior to write this book. This particular book is very easy to read you will get the point easily after looking over this book.

Miriam Normandin:

Do you have something that suits you such as a book? The reserve lovers usually prefer to opt for books like comic, brief story and the biggest you are novel. Now, why not hoping Embedded Hardware: Know It All (Newnes Know It All) that give your pleasure preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the opportunity for people to know the world considerably better than how they react in the direction of the world. It can't be claimed constantly that reading practice only for the geeky person but for all of you who want to be a success person. So, for all of you who want to start studying as your good habit, you can pick Embedded Hardware: Know It All (Newnes Know It All) become your personal starter.

Peter Chatman:

In this age of globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can see that now, a lot of publishers in which print many kinds of books. Often the book that recommended to your account is Embedded Hardware: Know It All (Newnes Know It All) this guide consists a lot of the information in the condition of this world now. This particular book was represented so why is the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. Often the writer made some analysis when he makes this book. That is why this book is ideal for all of you.

David Blunt:

Some individuals said that they feel uninterested when they read a book. They are directly felt it when they get a half portion of the book. You can choose the particular book Embedded Hardware: Know It All (Newnes Know It All) to make your own reading is interesting. Your personal skill of reading proficiency is developing when you similar to reading. Try to choose basic book to make you enjoy to learn it and mingle the opinion about book and reading especially. It is to be initially opinion for you to like to open a book and

learn it. Beside that the guide Embedded Hardware: Know It All (Newnes Know It All) can to be your new friend when you're feel alone and confuse using what must you're doing of their time.
