Handbook of Infant, Toddler, and Preschool Mental Health Assessment

From Oxford University Press

The *Handbook of Infant, Toddler, and Preschool Mental Health Assessment* brings together, for the first time, leading clinical researchers to provide empirically based recommendations for assessment of social-emotional and behavior problems and disorders in the earliest years. Each author presents state-of-the-art information on scientifically valid, developmentally based clinical assessments and makes recommendations based on the integration of developmental theory, empirical findings, and clinical experience.

Though the field of mental health assessment in infants and young children lags behind work with older children and adults, recent scientific advances, including new measures and diagnostic approaches, have led to dramatic growth in the field. The editors of this exciting new work have assembled an extraordinary collection of chapters that thoroughly discuss the conceptualizations of dysfunction in infants and young children, current and new diagnostic criteria, and such specific disorders as sensory modulation dysfunction, sleep disorders, eating and feeding disorders, autistic spectrum disorders, anxiety disorders, posttraumatic stress disorder, and ADHD. Chapters further highlight the importance of incorporating contextual factors such as parent-child relationship functioning and cultural background into the assessment process to increase the validity of findings.

Given the comprehensiveness of this groundbreaking volume in reviewing conceptual, methodological, and research advances on early identification, diagnosis, and clinical assessment of disorders in this young age group, it will be an ideal resource for teachers, researchers, and a wide variety of clinicians including child psychologists, child psychiatrists, early intervention providers, early special educators, social workers, family physicians, and pediatricians.

Editorial Review

Review

"A unique and singular book, this volume is really the first comprehensive approach to assessment of mental health in infants, toddlers, and preschool children. This is a much-needed volume that will advance both research and clinical work. It will be of great interest and value to investigators, practitioners, and students alike. - *Fred R. Volkmar, Yale University*

About the Author

Rebecca DelCarmen-Wiggins is at National Institute of Mental Health. Alice Carter is at University of Massachusetts, Boston.

Users Review

From reader reviews:

Barbara Richardson:

As people who live in the actual modest era should be update about what going on or data even knowledge to make these people keep up with the era that is always change and advance. Some of you maybe will update themselves by studying books. It is a good choice in your case but the problems coming to a person is you don't know what one you should start with. This Handbook of Infant, Toddler, and Preschool Mental Health Assessment is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

Richard Freed:

This Handbook of Infant, Toddler, and Preschool Mental Health Assessment is great book for you because the content which is full of information for you who also always deal with world and also have to make decision every minute. This particular book reveal it information accurately using great plan word or we can state no rambling sentences included. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but tricky core information with beautiful delivering sentences. Having Handbook of Infant, Toddler, and Preschool Mental Health Assessment in your hand like finding the world in your arm, info in it is not ridiculous one particular. We can say that no reserve that offer you world with ten or fifteen tiny right but this book already do that. So , it is good reading book. Hi Mr. and Mrs. active do you still doubt that will?

Myra McKenzie:

In this era globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to you is Handbook of Infant, Toddler, and Preschool Mental Health Assessment this guide consist a lot of the information of the condition of this world now. That book was represented how can the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. Typically the writer made some research when he makes this book. Here is why this book suitable all of you.

Marianne Button:

Do you like reading a e-book? Confuse to looking for your chosen book? Or your book was rare? Why so many issue for the book? But just about any people feel that they enjoy to get reading. Some people likes examining, not only science book but in addition novel and Handbook of Infant, Toddler, and Preschool Mental Health Assessment or even others sources were given information for you. After you know how the truly amazing a book, you feel would like to read more and more. Science e-book was created for teacher as well as students especially. Those textbooks are helping them to bring their knowledge. In some other case, beside science reserve, any other book likes Handbook of Infant, Toddler, and Preschool Mental Health Assessment to make your spare time considerably more colorful. Many types of book like here.
