Introduction to Modern Time Series Analysis (Springer Texts in Business and Economics) By Gebhard Kirchgässner, Jürgen Wolters, Uwe Hassler

This book presents modern developments in time series econometrics that are applied to macroeconomic and financial time series, bridging the gap between methods and realistic applications. It presents the most important approaches to the analysis of time series, which may be stationary or nonstationary. Modelling and forecasting univariate time series is the starting point. For multiple stationary time series, Granger causality tests and vector autoregressive models are presented. As the modelling of nonstationary uni- or multivariate time series is most important for real applied work, unit root and cointegration analysis as well as vector error correction models are a central topic. Tools for analysing nonstationary data are then transferred to the panel framework. Modelling the (multivariate) volatility of financial time series with autoregressive conditional heteroskedastic models is also treated.

Editorial Review

From the Back Cover

This book presents modern developments in time series econometrics that are applied to macroeconomic and financial time series, bridging the gap between methods and realistic applications. It presents the most important approaches to the analysis of time series, which may be stationary or nonstationary. Modelling and forecasting univariate time series is the starting point. For multiple stationary time series, Granger causality tests and vector autoregressive models are presented. As the modelling of nonstationary uni- or multivariate time series is most important for real applied work, unit root and cointegration analysis as well as vector error correction models are a central topic. Tools for analysing nonstationary data are then transferred to the panel framework. Modelling the (multivariate) volatility of financial time series with autoregressive conditional heteroskedastic models is also treated.

Users Review

From reader reviews:

Rosa Johnson:

Your reading 6th sense will not betray anyone, why because this Introduction to Modern Time Series Analysis (Springer Texts in Business and Economics) book written by well-known writer who really knows well how to make book that could be understand by anyone who else read the book. Written within good manner for you, still dripping wet every ideas and creating skill only for eliminate your own hunger then you still uncertainty Introduction to Modern Time Series Analysis (Springer Texts in Business and Economics) as good book not simply by the cover but also through the content. This is one reserve that can break don't judge book by its include, so do you still needing a different sixth sense to pick this!?! Oh come on your examining sixth sense already alerted you so why you have to listening to a different sixth sense.

Jonathan Ownby:

Reading a book to become new life style in this year; every people loves to go through a book. When you read a book you can get a lots of benefit. When you read books, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, and soon. The Introduction to Modern Time Series Analysis (Springer Texts in Business and Economics) offer you a new experience in studying a book.

Steven Connell:

This Introduction to Modern Time Series Analysis (Springer Texts in Business and Economics) is completely new way for you who has fascination to look for some information given it relief your hunger of information. Getting deeper you on it getting knowledge more you know or perhaps you who still having little bit of digest in reading this Introduction to Modern Time Series Analysis (Springer Texts in Business and Economics) can be the light food for yourself because the information inside that book is easy to get by simply anyone. These books build itself in the form and that is reachable by anyone, yes I mean in the e-book web form. People who think that in e-book form make them feel tired even dizzy this e-book is the answer. So you cannot find any in reading a reserve especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss that! Just read this e-book kind for your better life as well as knowledge.

Fran Short:

Within this era which is the greater person or who has ability in doing something more are more special than other. Do you want to become among it? It is just simple method to have that.
