Marine Medicinal Foods, Volume 65: Implications and Applications: Animals and Microbes (Advances in Food and Nutrition Research) From Academic Press

This volume on medicinal foods from the sea narrates the bioactive principles of various marine floral (vertebrate and Invertebrate), faunal (Macro and Micro algal) and microbial sources. Contributions from eminent scientists worldwide explain about the latest advance implications in the development and application of marine originated functional foods, as potential pharmaceuticals and medicines for the benefit of humankind by meeting the present nutraceutical demands.

- The latest important information for food scientists and nutritionists
- Peer-reviewed articles by a panel of respected scientists
- The go-to series since 1948

Editorial Review

Review

"While marine species make up about half of global biodiversity, their extensive capacity to produce natural products and its importance to marine pharmaceutical and nutraceutical companies and others was only recently discovered by the scientific communities. The field of marine biotechnology is looking at microbes and animals like algae, sponges, and coral as a plentiful source of substances for use in the treatment of severe human diseases. This book explores the current status and potential for medicinal foods from marine animals, the various compounds available, and the staggering possibilities of their use in treating a wide range of diseases, from cancer to hypertension and much more." --**Reference and Research Book News, August 2012**

About the Author

Professor Se-Kwon Kim, PhD, currently serves as a senior professor in the Department of Chemistry and the director of the Marine Bioprocess Research Center (MBPRC) at Pukyong National University in the Republic of Korea. He received his BSc, MSc, and PhD from the Pukyong National University and joined as a faculty member. He has previously served as a scientist in the University of Illinois, Urbana-Champaign, Illinois (1988-1989), and was a visiting scientist at the Memorial University of Newfoundland, Canada (1999-2000).

Professor Se-Kwon Kim was the first president of the Korean Society of Chitin and Chitosan (1986-1990) and the Korean Society of Marine Biotechnology (2006-2007). He was also the chairman for the 7th Asia-Pacific Chitin and Chitosan Symposium, which was held in South Korea in 2006. He is one of the board members of the International Society of Marine Biotechnology and the International Society for Nutraceuticals and Functional Foods. Moreover, he was the editor in chief of the Korean Journal of Life Sciences (1995-1997), the Korean Journal of Fisheries Science and Technology (2006-2007), and the Korean Journal of Marine Bioscience and Biotechnology (2006-present). His research has been credited with the best paper award from the American Oil Chemist's Society (AOCS) and the Korean Society of Fisheries Science and Technology in 2002.

Professor Se-Kwon Kim's major research interests are investigation and development of bioactive substances derived from marine organisms and their application in oriental medicine, nutraceuticals, and cosmeceuticals via marine bioprocessing and mass- production technologies. He has also conducted research on the development of bioactive materials from marine organisms for applications in oriental medicine, cosmeceuticals, and nutraceuticals. To date, he has authored over 600 research papers and holds 152 patents. In addition, he has written or edited more than 60 books.

Users Review

From reader reviews:

Lula Estes:

In this 21st one hundred year, people become competitive in every single way. By being competitive right now, people have to do something to make themselves survive, being in the middle of the crowded place and notice by means of surrounding. One thing that often many people have underestimated that for a while is reading. Yep, by reading a publication your ability to survive improves then having a chance to stand than others is high. For you who want to start reading any book, we give you this kind of Marine Medicinal Foods, Volume 65: Implications and Applications: Animals and Microbes (Advances in Food and Nutrition Research) book as a nice and daily reading reserve. Why, because this book is greater than just a book.

Mike Hodges:

Nowadays reading books become more than want or need but also work as a life style. This reading behavior gives you a lot of advantages. The benefits you get of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The information you get based on what kind of book you read, if you want drive more knowledge just go with knowledge books but if you want sense happy read one with theme for entertaining for example comic or novel. The actual Marine Medicinal Foods, Volume 65: Implications and Applications: Animals and Microbes (Advances in Food and Nutrition Research) is kind of e-book which is giving the reader unforeseen experience.

Alyson Ward:

Reading a guide can be one of a lot of tasks that everyone in the world likes. Do you like reading books and so. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new data. When you read a guide you will get new information because a book is one of many ways to share the information or perhaps their idea. Second, looking at a book will make you actually more imaginative. When you examine a book especially a hype book the author will bring that you imagine the story how the figures do it anything. Third, you can share your knowledge to others. When you read this Marine Medicinal Foods, Volume 65: Implications and Applications: Animals and Microbes (Advances in Food and Nutrition Research), you may tell your family, friends in addition to soon about yours reserve. Your knowledge can inspire average, make them reading a book.

Cynthia Ncaise:

Within this era which is the greater man or who has ability to do something more are more important than others. Do you want to become one of it? It is just a simple solution to have that. What you need to do is just spending your time not very much but quite enough to enjoy a look at some books. One of several books in the top collection in your reading list is definitely Marine Medicinal Foods, Volume 65: Implications and Applications: Animals and Microbes (Advances in Food and Nutrition Research). This book which can be qualified as The Hungry Inclines can get you closer in getting precious person. By looking up and review this reserve you can get many advantages.
