**Probabilistic Networks and Expert Systems: Exact Computational Methods for Bayesian Networks (Information Science and Statistics)** By Robert G. Cowell, Philip Dawid, Steffen L. Lauritzen, David J. Spiegelhalter

Probabilistic expert systems are graphical networks which support the modeling of uncertainty and decisions in large complex domains, while retaining ease of calculation. Building on original research by the authors, this book gives a thorough and rigorous mathematical treatment of the underlying ideas, structures, and algorithms. The book will be of interest to researchers in both artificial intelligence and statistics, who desire an introduction to this fascinating and rapidly developing field. The book, winner of the DeGroot Prize 2002, the only book prize in the field of statistics, is new in paperback.

## **Editorial Review**

Review

From the reviews:

JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

"This important book fills a void in the graphical Markov models literature. The authors have summarized their extensive and influential work in this area and provided a valuable resource both for educators and for practitioners."

From the Back Cover

Winner of the 2002 DeGroot Prize.

Probabilistic expert systems are graphical networks that support the modelling of uncertainty and decisions in large complex domains, while retaining ease of calculation. Building on original research by the authors over a number of years, this book gives a thorough and rigorous mathematical treatment of the underlying ideas, structures, and algorithms, emphasizing those cases in which exact answers are obtainable. It covers both the updating of probabilistic uncertainty in the light of new evidence, and statistical inference, about unknown probabilities or unknown model structure, in the light of new data. The careful attention to detail will make this work an important reference source for all those involved in the theory and applications of probabilistic expert systems.

This book was awarded the first DeGroot Prize by the International Society for Bayesian Analysis for a book making an important, timely, thorough, and notably original contribution to the statistics literature.

Robert G. Cowell is a Lecturer in the Faculty of Actuarial Science and Insurance of the Sir John Cass Business School, City of London. He has been working on probabilistic expert systems since 1989.

A. Philip Dawid is Professor of Statistics at Cambridge University. He has served as Editor of the *Journal of the Royal Statistical Society (Series B)*, *Biometrika* and *Bayesian Analysis*, and as President of the International Society for Bayesian Analysis. He holds the Royal Statistical Society Guy Medal in Bronze and in Silver, and the Snedecor Award for the Best Publication in Biometry.

Steffen L. Lauritzen is Professor of Statistics at the University of Oxford. He has served as Editor of the *Scandinavian Journal of Statistics*. He holds the Royal Statistical Society Guy Medal in Silver and is an Honorary Fellow of the same society. He has, jointly with David J. Spiegelhalter, received the American Statistical Association's award for an "Outstanding Statistical Application."

David J. Spiegelhalter is Winton Professor of the Public Understanding of Risk at Cambridge University and Senior Scientist in the MRC Biostatistics Unit, Cambridge. He has published extensively on Bayesian methodology and applications, and holds the Royal Statistical Society Guy Medal in Bronze and in Silver.

## **Users Review**

### **From reader reviews:**

#### **Todd Jacobs:**

Do you have favorite book? Should you have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each e-book has different aim or perhaps goal; it means that book has different type. Some people truly feel enjoy to spend their time to read a book. They are really reading whatever they have because their hobby will be reading a book. Think about the person who don't like examining a book? Sometime, man feel need book when they found difficult problem as well as exercise. Well, probably you will want this Probabilistic Networks and Expert Systems: Exact Computational Methods for Bayesian Networks (Information Science and Statistics).

#### **Calvin Fischer:**

Have you spare time for a day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to the particular Mall. How about open or read a book eligible Probabilistic Networks and Expert Systems: Exact Computational Methods for Bayesian Networks (Information Science and Statistics)? Maybe it is to become best activity for you. You understand beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with it is opinion or you have other opinion?

#### **Jocelyn Lee:**

Nowadays reading books become more than want or need but also become a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The details you get based on what kind of book you read, if you want send more knowledge just go with training books but if you want feel happy read one together with theme for entertaining for instance comic or novel. Often the Probabilistic Networks and Expert Systems: Exact Computational Methods for Bayesian Networks (Information Science and Statistics) is kind of reserve which is giving the reader unforeseen experience.

#### **Victor McDowell:**

Hey guys, do you wants to finds a new book to read? May be the book with the concept Probabilistic Networks and Expert Systems: Exact Computational Methods for Bayesian Networks (Information Science and Statistics) suitable to you? Typically the book was written by renowned writer in this era. Often the book untitled Probabilistic Networks and Expert Systems: Exact Computational Methods for Bayesian Networks (Information Science and Statistics)is the one of several books which everyone read now. This particular

book was inspired a lot of people in the world. When you read this book you will enter the new dimension that you ever know before. The author explained their concept in the simple way, thus all of people can easily to understand the core of this publication. This book will give you a great deal of information about this world now. So you can see the represented of the world on this book.
