Introduction to Laser Technology By C. Breck Hitz, James Ewing, Jeff Hecht

The only introductory text on the market today that explains the underlying physics and engineering applicable to all lasers

Although lasers are becoming increasingly important in our high-tech environment, many of the technicians and engineers who install, operate, and maintain them have had little, if any, formal training in the field of electro-optics. This can result in less efficient usage of these important tools.

Introduction to Laser Technology, Fourth Edition provides readers with a good understanding of what a laser is and what it can and cannot do. The book explains what types of laser to use for different purposes and how a laser can be modified to improve its performance in a given application. With a unique combination of clarity and technical depth, the book explains the characteristics and important applications of commercial lasers worldwide and discusses light and optics, the fundamental elements of lasers, and laser modification.?

In addition to new chapter-end problems, the *Fourth Edition* includes new and expanded chapter material on:

- Material and wavelength
- Diode Laser Arrays
- Quantum-cascade lasers
- Fiber lasers
- Thin-disk and slab lasers
- Ultrafast fiber lasers
- Raman lasers
- Quasi-phase matching
- Optically pumped semiconductor lasers

Introduction to Laser Technology, Fourth Edition is an excellent book for students, technicians, engineers, and other professionals seeking a fuller, more formal introduction to the field of laser technology.

Editorial Review

From the Back Cover

Electrical Engineering Introduction to Laser Technology Third Edition Would you like to know how a laser works, and how it can be modified for your own specific tasks? This intuitive third edition-previously published as *Understanding Laser Technology*, First and Second Editions-introduces engineers, scientists, technicians, and novices alike to the world of modern lasers, without delving into the mathematical details of quantum electronics. It is the only introductory text on the market today that explains the underlying physics and engineering applicable to all lasers. A unique combination of clarity and technical depth, this book begins with an introductory chapter that explains the characteristics and important applications of commercial lasers worldwide. It proceeds with discussions on light and optics, the fundamental elements of lasers, and laser modification. The concluding chapters are composed of a survey of modern lasers, including:

- * Semiconductor lasers
- * Optically pumped solid-state lasers
- * Ion, HeNe, and HeCd lasers
- * Carbon dioxide lasers
- * Excimer lasers (codiscovered by J. J. Ewing)
- * Ultrafast and tunable lasers, OPOs

Introduction to Laser Technology, Third Edition is intended for those who are familiar with the principles of electro-optical technology, but possess limited formal training. This comprehensive treatment is essential, one-stop shopping for professionals, students, and non-engineer executives interested in the design, sales, or applications of the laser and electro-optics industry.

About the Author

C. Breck Hitz is Executive Director of LEOMA, the Laser and Electro-Optics Manufacturers' Association. He was the founding editor of *Lasers & Applications* magazine, and a former editor of *Laser Focus World*.

J. J. Ewing is the President of Ewing Technology Associates, Inc. His pioneering work on high-efficiency, ultraviolet lasers led to the discovery and development of the rare gas halide excimer lasers.

Jeff Hecht is a contributing editor to *Laser Focus World* and correspondent for *New Scientist* magazine. He was a cofounder and contributing editor to *Lasers & Applications*. Mr. Hecht is the author of ten books, including *Understanding Lasers: An Entry-Level Guide* (Wiley-IEEE Press).

Users Review

From reader reviews:

Donald Hamann:

As people who live in the modest era should be upgrade about what going on or information even knowledge to make these individuals keep up with the era which can be always change and progress. Some of you maybe will certainly update themselves by reading through books. It is a good choice for you personally but the problems coming to a person is you don't know what one you should start with. This Introduction to

Laser Technology is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

Marvin Seto:

Spent a free time to be fun activity to do! A lot of people spent their free time with their family, or their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your personal free time/ holiday? May be reading a book might be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to consider look for book, may be the guide untitled Introduction to Laser Technology can be good book to read. May be it is usually best activity to you.

Thomas Hawkins:

Can you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Aim to pick one book that you find out the inside because don't judge book by its handle may doesn't work here is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer may be Introduction to Laser Technology why because the wonderful cover that make you consider about the content will not disappoint you. The inside or content is usually fantastic as the outside or maybe cover. Your reading sixth sense will directly guide you to pick up this book.

Lyndsey Lafferty:

This Introduction to Laser Technology is brand new way for you who has fascination to look for some information because it relief your hunger of information. Getting deeper you on it getting knowledge more you know or perhaps you who still having little bit of digest in reading this Introduction to Laser Technology can be the light food for you because the information inside this book is easy to get by anyone. These books develop itself in the form and that is reachable by anyone, that's why I mean in the e-book contact form. People who think that in publication form make them feel tired even dizzy this guide is the answer. So there is absolutely no in reading a e-book especially this one. You can find actually looking for. It should be here for you. So , don't miss this! Just read this e-book type for your better life as well as knowledge.
