Starting Out with C++: From Control Structures through Objects (7th Edition) By Tony Gaddis

Tony Gaddis's accessible, step-by-step presentation helps beginning students understand the important details necessary to become skilled programmers at an introductory level. Gaddis motivates the study of both programming skills and the C++ programming language by presenting all the details needed to understand the “how” and the “why”—but never losing sight of the fact that most beginners struggle with this material. His approach is both gradual and highly accessible, ensuring that students understand the logic behind developing high-quality programs.

In *Starting Out with C++: From Control Structures through Objects*, Gaddis covers control structures, functions, arrays, and pointers before objects and classes. As with all Gaddis texts, clear and easy-to-read code listings, concise and practical real-world examples, and an abundance of exercises appear in every chapter. This text is intended for either a one-semester accelerated introductory course or a traditional two-semester sequence covering C++ programming.

This edition is available with MyProgrammingLab, an innovative online homework and assessment tool. Through the power of practice and immediate personalized feedback, MyProgrammingLab helps students fully grasp the logic, semantics, and syntax of programming.

;

Note: If you are purchasing the standalone text or electronic version, MyProgrammingLab does not come automatically packaged with the text. To purchase MyProgrammingLab, please visit: myprogramminglab.com or you can purchase a package of the physical text + MyProgrammingLab by searching for ISBN 10: 0132774178 / ISBN 13: 9780132774178. MyProgrammingLab is not a self-paced technology and should only be purchased when required by an instructor.

Editorial Review

Review

"Great coverage and examples." — Ronald Conway, Bowling Green State University

"I think one of the great strengths is the inclusion of all of the source code files throughout all of the chapters. Also, the variety of supplemental resources (VideoNotes, PowerPoint presentations, Check Point and review questions, test bank questions) are very useful and provide the student with many avenues in acquiring proficiency of the course material." — Jeanette Gibbons, South Dakota State University

Introductory Programming / C++

About the Author

Tony Gaddis is the lead author of the *Starting Out with* series including *Starting Out with Alice*, C++, Java™, Visual Basic® 2010 and 2008, *Programming Logic & Design*, and *Python*. Visit the Gaddis Books website for more information on Gaddis' titles. Gaddis teaches computer science courses at Haywood Community College in North Carolina. He previously taught programming for several corporations and government agencies, including NASA's Kennedy Space Center. Gaddis is a highly acclaimed instructor who was selected as the North Carolina Community College "Teacher of the Year" in 1994, and who received the Teaching Excellence award from the National Institute for Staff and Organizational Development in 1997.

Users Review

From reader reviews:

Alfred Zoeller:

The book *Starting Out with C++: From Control Structures through Objects* (7th Edition) gives you the sense of being enjoy for your spare time. You need to use to make your capable a lot more increase. Book can to become your best friend when you getting stress or having big problem with the subject. If you can make examining a book *Starting Out with C++: From Control Structures through Objects* (7th Edition) being your habit, you can get far more advantages, like add your capable, increase your knowledge about a number of or all subjects. You may know everything if you like available and read a book *Starting Out with C++: From Control Structures through Objects* (7th Edition). Kinds of book are a lot of. It means that, science e-book or encyclopedia or some others. So , how do you think about this e-book?

John Mullen:

What do you ponder on book? It is just for students because they are still students or it for all people in the world, what the best subject for that? Merely you can be answered for that question above. Every person has various personality and hobby per other. Don't to be compelled someone or something that they don't want do that. You must know how great along with important the book *Starting Out with C++: From Control Structures through Objects* (7th Edition). All type of book are you able to see on many methods. You can

look for the internet solutions or other social media.

Joan Naylor:

Now a day people who Living in the era where everything reachable by interact with the internet and the resources within it can be true or not call for people to be aware of each facts they get. How individuals to be smart in obtaining any information nowadays? Of course the answer is reading a book. Reading through a book can help individuals out of this uncertainty Information specifically this Starting Out with C++: From Control Structures through Objects (7th Edition) book as this book offers you rich facts and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you know.

Kirk Qualls:

Playing with family in a very park, coming to see the ocean world or hanging out with close friends is thing that usually you will have done when you have spare time, in that case why you don't try thing that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Starting Out with C++: From Control Structures through Objects (7th Edition), you are able to enjoy both. It is excellent combination right, you still wish to miss it? What kind of hang type is it? Oh can occur its mind hangout fellas. What? Still don't obtain it, oh come on its named reading friends.
