## STUDENT COMPANION SITE

Every new copy of Stuart Wentworth's Applied Electromagnetics comes with a registration code which allows access to the Student's Book Companion Site. On the BCS the student will find:

- \* Detailed Solutions to Odd-Numbered Problems in the text
- \* Detailed Solutions to all Drill Problems from the text
- \* MATLAB code for all the MATLAB examples in the text
- \* Additional MATLAB demonstrations with code. This includes a Transmission Lines simulator created by the author.
- \* Weblinks to a vast array of resources for the engineering student.

Go to [www.wiley.com/college/wentworth](http://www.wiley.com/college/wentworth) to link to Applied Electromagnetics and the Student Companion Site.

## ABOUT THE PHOTO

Passive RFID systems, consisting of readers and tags, are expected to replace bar codes as the primary means of identification, inventory and billing of everyday items. The tags typically consist of an RFID chip placed on a flexible film containing a planar antenna. The antenna captures radiation from the reader's signal to power the tag electronics, which then responds to the reader's query. The PENI Tag (Product Emitting Numbering Identification Tag) shown, developed by the University of Pittsburgh in a team led by Professor Marlin H. Mickle, integrates the antenna with the rest of the tag electronics. RFID systems involve many electromagnetics concepts, including antennas, radiation, transmission lines, and microwave circuit components. (Photo courtesy of Marlin H. Mickle.)

### Editorial Review

From the Back Cover

#### ELECTROMAGNETICS FOR A WIRELESS WORLD

The revolution in wireless communications calls for a new focus in the electrical engineering curriculum. Stuart M. Wentworth pioneers this new approach with his new *Applied Electromagnetics: Early Transmission Lines Approach*. Incorporating the popular MATLAB program throughout, this book starts you off with a rock-solid foundation on such basics as static electric and magnetic fields, dynamic fields, and plane waves. It then prepares you for the new wireless world with a concerted focus on practical applications for wireless systems, transmission lines, waveguides (including optical fiber), antennas, and microwave systems.

Numerous worked out examples, drill problems, and end-of-chapter problems will clarify your understanding of electromagnetics, and the many MATLAB examples and problems will ensure your mastery of the information. Intelligently designed and feature-packed, Wentworth's *Applied Electromagnetics* offers a rare marriage of detailed theoretical grounding and hands-on experience in harmony with today's professional practice.

#### STUDENT COMPANION SITE

Every new copy of Stuart Wentworth's *Applied Electromagnetics* comes with a registration code which allows access to the Student's Book Companion Site. On the Book Companion Site, the reader will find:

- Detailed Solutions to Odd-Numbered Problems in the text.
- Detailed Solutions to all Drill Problems from the text.
- MATLAB code for all the MATLAB examples in the text.
- Additional MATLAB demonstrations with code. This includes a Transmission Lines simulator created by the author.
- Weblinks to a vast array of resources for the engineering student.

About the Author

## **ABOUT THE AUTHOR**

**Stuart M. Wentworth** received his B.S degree in Chemical Engineering from Auburn University, Alabama, in 1982 and his M.S. (1987) and Ph.D. (1990) degrees in Electrical Engineering from the University of Texas at Austin. He has been a member of the Electrical & Computer Engineering faculty at Auburn University, Alabama since 1990. Dr. Wentworth's research has focused on the high frequency characterization of materials used for electronics packaging. He is the author of *Fundamentals of Electromagnetics with Engineering Applications* (Wiley). Dr. Wentworth has received numerous teaching awards at Auburn University, including the Birdsong Merit Teaching Award in 1999. He is a Senior Member of the Institute of Electrical and Electronics Engineers (IEEE).

## **Users Review**

### **From reader reviews:**

#### **Hazel Polk:**

In other case, little folks like to read book Applied Electromagnetics : Early Transmission Lines Approach. You can choose the best book if you'd prefer reading a book. So long as we know about how is important any book Applied Electromagnetics : Early Transmission Lines Approach. You can add expertise and of course you can around the world by just a book. Absolutely right, because from book you can realize everything! From your country until finally foreign or abroad you will be known. About simple factor until wonderful thing you can know that. In this era, we are able to open a book or perhaps searching by internet device. It is called e-book. You need to use it when you feel bored to go to the library. Let's examine.

#### **David Creason:**

Reading a guide can be one of a lot of action that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new facts. When you read a guide you will get new information mainly because book is one of many ways to share the information or perhaps their idea. Second, studying a book will make anyone more imaginative. When you examining a book especially fiction book the author will bring that you imagine the story how the character types do it anything. Third, you can share your knowledge to other individuals. When you read this Applied Electromagnetics : Early Transmission Lines Approach, you could tells your family, friends in addition to soon about yours book. Your knowledge can inspire average, make them reading a guide.

#### **Gary Spengler:**

You may spend your free time to learn this book this book. This Applied Electromagnetics : Early Transmission Lines Approach is simple to deliver you can read it in the recreation area, in the beach, train and also soon. If you did not have got much space to bring the particular printed book, you can buy the particular e-book. It is make you easier to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

**Daniel Adams:**

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is composed or printed or outlined from each source that will filled update of news. With this modern era like today, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just looking for the Applied Electromagnetics : Early Transmission Lines Approach when you desired it?
