Aulton's Pharmaceutics: The Design and Manufacture of Medicines, 4e

From Churchill Livingstone

Pharmaceutics is one of the most diverse subject areas in all of pharmaceutical science. In brief, it is concerned with the scientific and technological aspects of the design and manufacture of dosage forms or medicines. An understanding of pharmaceutics is therefore vital for all pharmacists and those pharmaceutical scientists who are involved with converting a drug or a potential drug into a medicine that can be delivered safely, effectively and conveniently to the patient.

Now in its fourth edition, this best-selling textbook in pharmaceutics has been brought completely up to date to reflect the rapid advances in delivery methodologies by eye and injection, advances in drug formulations and delivery methods for special groups (such as children and the elderly), nanomedicine, and pharmacognosy. At the same time the editors have striven to maintain the accessibility of the text for students of pharmacy, preserving the balance between being a suitably pitched introductory text and a clear reflection of the state of the art.

- provides a logical, comprehensive account of drug design and manufacture
- includes the science of formulation and drug delivery
- designed and written for newcomers to the design of dosage forms

New to this edition

Thoroughly revised and updated throughout.

From customer reviews of the previous edition 'For all the pharmacy students out there part of your pharmacy degree will be to study formulation design and pharmaceuticals. This is the holy grail of pharmaceutical technology books. The text reads well and introduces difficult concepts in a more easy-to-understand way. It is definitely worth the money to help you get through the module, If you are doing a research project in pharmaceutical design then this would also be an excellent buy.' 'In my pharmacy degree I have to do a Physiochemical Principles of Pharmacy module which is about drug forms/dosage etc. and this book really helps and is really well laid out and easy to understand. Definitely a book I would recommend to any pharmacy student and my lecturer says it's a book needed for nearly the whole degree so means it's not another book you'll use once and then wonder why you spent so much on it.' 'This book is on most reading lists for a UK Pharmacy Degree (MPharm). It is great for the Pharmaceuticals aspect of the course. It is easy to read, with good diagrams and pictures to help explain concepts well. It is probably one of the easiest reads for Pharmaceuticals textbooks. It is also helpful when writing lab reports and assignments and is a good reference source.' 'This book has been a great help to me. I have found it very useful for pharmacy.' Users

ReviewFrom reader reviews:

Evelyn Blow:What do you concerning book? It is not important to you? Or just adding material when you want something to explain what the ones you have problem? How about your time? Or are you busy particular person? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Every individual has many questions above. They need to answer that question simply because just their can do this. It said that about reserve. Book is familiar on every person. Yes, it is right. Because start from on kindergarten until university need this Aulton's Pharmaceuticals: The Design and Manufacture of Medicines, 4e to read.

Crystal Scott:In this period of time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. The particular book that recommended to your account is Aulton's Pharmaceuticals: The Design and Manufacture of Medicines, 4e this reserve consist a lot of the information from the condition of this world now. This specific book was represented so why is the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. The actual writer made some exploration when he makes this book. This is why this book ideal all of you.

Marcus Casale:Don't be worry in case you are afraid that this book will probably filled the space in your house, you might have it in e-book way, more simple and reachable. This particular Aulton's Pharmaceuticals: The Design and Manufacture of Medicines, 4e can give you a lot of close friends because by you checking out this one book you have point that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This reserve offer you information that probably your friend doesn't learn, by knowing more than other make you to be great persons. So , why hesitate? We should have Aulton's Pharmaceuticals: The Design and Manufacture of Medicines, 4e.

Patricia McGuire:As a pupil exactly feel bored to reading. If their teacher asked them to go to the library or even make summary for some guide, they are complained. Just tiny students that has reading's spirit or real their hobby. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring in addition to can't see colorful photos on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Aulton's Pharmaceuticals: The Design and Manufacture of Medicines, 4e can make you truly feel more interested to read.
