Automatic Control of Converter-Fed Drives, Volume 46 (Studies in Electrical and Electronic Engineering) By Marian P. Kazmierkowski, Henryk Tunia

This book introduces the reader in a systematical way to the design philosophy behind vector control systems. The mathematical motor models based on complex-space vector descriptions as well as the control structures for DC motors provide a perfect basis for explaining the principles of AC motor vector control. An in-depth review of electromagnetic transients in induction motors under various methods of frequency control is given. This is explained with the help of appropriate block schemes and new equivalent circuits. Properties of AC motors under non-sinusoidal supply are reviewed. The basic power converter topologies applied in motor control technology as well as symmetry and loss reduction problems are discussed. Some examples of controller design methods are presented step by step. An important feature of the book is that it contains many examples of systems applied in practical engineering as well as simulation and experimental results. The volume will be of interest to all those familiar with the basics of electrical machines and control systems theory. Therefore, it is recommended to students of electrical, electronics and mechanics departments. The book can also be used by those working in industry, who are interested in modern power electronics, drives and motion control, robotics as well as automation of industrial processes.

Editorial Review

Users Review

From reader reviews:

Della Richardson:

Book is usually written, printed, or created for everything. You can recognize everything you want by a book. Book has a different type. As it is known to us that book is important thing to bring us around the world. Close to that you can your reading ability was fluently. A book Automatic Control of Converter-Fed Drives, Volume 46 (Studies in Electrical and Electronic Engineering) will make you to possibly be smarter. You can feel considerably more confidence if you can know about anything. But some of you think that will open or reading some sort of book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you trying to find best book or appropriate book with you?

Shannon Grant:

Reading a book tends to be new life style in this particular era globalization. With looking at you can get a lot of information which will give you benefit in your life. Using book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their reader with their story as well as their experience. Not only the storyline that share in the guides. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors these days always try to improve their expertise in writing, they also doing some analysis before they write to the book. One of them is this Automatic Control of Converter-Fed Drives, Volume 46 (Studies in Electrical and Electronic Engineering).

Carolyn Berndt:

Precisely why? Because this Automatic Control of Converter-Fed Drives, Volume 46 (Studies in Electrical and Electronic Engineering) is an unordinary book that the inside of the e-book waiting for you to snap the idea but latter it will distress you with the secret the item inside. Reading this book beside it was fantastic author who write the book in such wonderful way makes the content on the inside easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you for not hesitating having this any more or you going to regret it. This unique book will give you a lot of benefits than the other book have got such as help improving your talent and your critical thinking method. So , still want to hesitate having that book? If I were being you I will go to the guide store hurriedly.

Christina Bales:

Automatic Control of Converter-Fed Drives, Volume 46 (Studies in Electrical and Electronic Engineering)

can be one of your beginner books that are good idea. We recommend that straight away because this e-book has good vocabulary that could increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The article author giving his/her effort to put every word into satisfaction arrangement in writing Automatic Control of Converter-Fed Drives, Volume 46 (Studies in Electrical and Electronic Engineering) yet doesn't forget the main level, giving the reader the hottest as well as based confirm resource facts that maybe you can be considered one of it. This great information may drawn you into brand-new stage of crucial thinking.
