Electrodynamics: An Intensive Course By Masud Chaichian, Ioan Merches, Daniel Radu, Anca Tureanu

This book is devoted to the fundamentals of classical electrodynamics, one of the most beautiful and productive theories in physics. A general survey on the applicability of physical theories shows that only few theories can be compared to electrodynamics. Essentially, all electric and electronic devices used around the world are based on the theory of electromagnetism.

It was Maxwell who created, for the first time, a unified description of the electric and magnetic phenomena in his electromagnetic field theory. Remarkably, Maxwell's theory contained in itself also the relativistic invariance of the special relativity, a fact which was discovered only a few decades later.

The present book is an outcome of the authors' teaching experience over many years in different countries and for different students studying diverse fields of physics. The book is intended for students at the level of undergraduate and graduate studies in physics, astronomy, engineering, applied mathematics and for researchers working in related subjects.

We hope that the reader will not only acquire knowledge, but will also grasp the beauty of theoretical physics. A set of about 130 solved and proposed problems shall help to attain this aim.

Editorial Review

From the Back Cover

This book is devoted to the fundamentals of classical electrodynamics, one of the most beautiful and productive theories in physics. A general survey on the applicability of physical theories shows that only few theories can be compared to electrodynamics. Essentially, all electric and electronic devices used around the world are based on the theory of electromagnetism.

It was Maxwell who created, for the first time, a unified description of the electric and magnetic phenomena in his electromagnetic field theory. Remarkably, Maxwell's theory contained in itself also the relativistic invariance of the special relativity, a fact which was discovered only a few decades later.

The present book is an outcome of the authors' teaching experience over many years in different countries and for different students studying diverse fields of physics. The book is intended for students at the level of undergraduate and graduate studies in physics, astronomy, engineering, applied mathematics and for researchers working in related subjects.

We hope that the reader will not only acquire knowledge, but will also grasp the beauty of theoretical physics. A set of about 130 solved and proposed problems shall help to attain this aim.

About the Author

Masud Chaichian: Editor journal EPJ C, very prominent scientist in high energy physics.

Previous affiliations: Durham Univ, UK; Rutherford Appleton Laboratory, UK; Hamburg Univ, Germany;

Weizmann Institute, Israel; CERN.

Scientific interests: Quantum Field Theory, Noncommutative geometry, String theory,

Higher-Dimensional Theories

Teaching: Over 20 years experience in teaching Theories of Elementary Particle Physics, Path

Integrals, Theoretical physics

261 publications in SPIRES.

Address:

High Energy Physics Division

Department of Physical Sciences and Helsinki Institute of Physics

POB 64 (Gustaf Hällströmin katu 2), FIN-00014 University of Helsinki, Finland

TWM market research - Classical Electrodynamics:

Market Size Estimate 22,200 per year

Market Leaders

- 1) Griffiths 3/e, '99 (Prentice Hall) 13,300 60%
- 2) Jackson 3/e, '99 (Wiley) 5,400 24%
- 3) Purcell 2/e, '85 (McGraw-Hill) 1,000 5%

Textbook features:

problems with solutions, end of chapter summaries, worked examples, high level figures, boxed inserts, highlighted key math and explanations, appendix, index

Users Review

From reader reviews:

Nikki Jones:

What do you ponder on book? It is just for students as they are still students or this for all people in the world, what best subject for that? Simply you can be answered for that problem above. Every person has diverse personality and hobby for each other. Don't to be forced someone or something that they don't want do that. You must know how great and important the book *Electrodynamics: An Intensive Course*. All type of book can you see on many solutions. You can look for the internet solutions or other social media.

Diane Reid:

Typically the book *Electrodynamics: An Intensive Course* will bring that you the new experience of reading some sort of book. The author style to spell out the idea is very unique. Should you try to find new book you just read, this book very suitable to you. The book *Electrodynamics: An Intensive Course* is much recommended to you to learn. You can also get the e-book from official web site, so you can more readily to read the book.

Yvonne Tetrault:

In this period of time globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher which print many kinds of book. Typically the book that recommended to you is *Electrodynamics: An Intensive Course* this e-book consist a lot of the information

with the condition of this world now. This kind of book was represented so why is the world has grown up. The words styles that writer require to explain it is easy to understand. The actual writer made some exploration when he makes this book. This is why this book ideal all of you.

Erica Futch:

What is your hobby? Have you heard this question when you got college students? We believe that that issue was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you also know that little person like reading or as looking at become their hobby. You must know that reading is very important as well as book as to be the matter. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. Different categories of books that can you choose to adopt be your object. One of them is Electrodynamics: An Intensive Course.
