Editorial Review

About the Author

Thomas Engel has taught chemistry for more than 20 years at the University of Washington, where he is currently Professor of Chemistry and Associate Chair for the Undergraduate Program. Professor Engel received his bachelor's and master's degrees in chemistry from the Johns Hopkins University, and his Ph.D. in chemistry from the University of Chicago. He then spent 11 years as a researcher in Germany and Switzerland, in which time he received the Dr. rer. nat. habil. degree from the Ludwig Maximilians University in Munich. In 1980, he left the IBM research laboratory in Zurich to become a faculty member at the University of Washington.

Professor Engel's research interests are in the area of surface chemistry, and he has published more than 80 articles and book chapters in this field. He has received the Surface Chemistry or Colloids Award from the American Chemical Society and a Senior Humboldt Research Award from the Alexander von Humboldt Foundation, which has allowed him to establish collaborations with researchers in Germany. He is currently working together with European manufacturers of catalytic converters to improve their performance for diesel engines.

Philip Reid has taught chemistry at the University of Washington since he joined the chemistry faculty in 1995. Professor Reid received his bachelor's degree from the University of Puget Sound in 1986, and his Ph.D. in chemistry from the University of California at Berkeley in 1992. He performed postdoctoral research at the University of Minnesota, Twin Cities, campus before moving to Washington.

Professor Reid's research interests are in the areas of atmosphere chemistry, condensed-phase reaction dynamics, and nonlinear optical materials. He has published more than 70 articles in these fields. Professor Reid is the recipient of a CAREER award from the National Science Foundation, is a Cottrell Scholar of the Research Corporation, and is a Sloan fellow.

Users Review

From reader reviews:

Donald Howard:

Within other case, little individuals like to read book Physical Chemistry (3rd Edition). You can choose the best book if you'd prefer reading a book. So long as we know about how is important some sort of book Physical Chemistry (3rd Edition). You can add knowledge and of course you can around the world by way of a book. Absolutely right, since from book you can understand everything! From your country until foreign or abroad you will end up known. About simple matter until wonderful thing you are able to know that. In this era, we could open a book as well as searching by internet unit. It is called e-book. You may use it when you feel uninterested to go to the library. Let's study.

Scott Croft:

Book will be written, printed, or highlighted for everything. You can realize everything you want by a book.

Book has a different type. We all know that that book is important thing to bring us around the world. Adjacent to that you can your reading ability was fluently. A reserve Physical Chemistry (3rd Edition) will make you to possibly be smarter. You can feel much more confidence if you can know about anything. But some of you think this open or reading a new book make you bored. It isn't make you fun. Why they might be thought like that? Have you in search of best book or appropriate book with you?

Brian Paige:

Reading a publication can be one of a lot of task that everyone in the world loves. Do you like reading book so. There are a lot of reasons why people like it. First reading a book will give you a lot of new details. When you read a guide you will get new information due to the fact book is one of a number of ways to share the information or perhaps their idea. Second, reading a book will make you more imaginative. When you looking at a book especially fictional works book the author will bring one to imagine the story how the characters do it anything. Third, you are able to share your knowledge to other folks. When you read this Physical Chemistry (3rd Edition), you may tells your family, friends along with soon about yours book. Your knowledge can inspire the others, make them reading a e-book.

Barbara Guevara:

Is it you actually who having spare time after that spend it whole day through watching television programs or just telling lies on the bed? Do you need something totally new? This Physical Chemistry (3rd Edition) can be the respond to, oh how comes? It's a book you know. You are consequently out of date, spending your extra time by reading in this completely new era is common not a geek activity. So what these textbooks have than the others?
